ADVISORY COMMITTEE

Dr. G T RAJU
Principal, SJCIT
Organising Chair

Sri SHIVASHANKAR
Chief Executive Officer
Zilla Panchayat, Chikkaballapur

ORGANIZING COMMITTEE

Mr. SURESHA J
Registrar
SJCIT

Mr. V KUNHAMBU
Regional Director, CGWB
Bangalore.

Mr. RAVINDRA M V
Associate Professor
Co-ordinator

Dr. G NARAYANA
Prof. & Head, CED
Program Chair

The Chikkaballapur district has no perennial water sources for both agriculture and drinking water purposes. The only source of water is ground water. The average ground water level is 75 m.

Agriculture was mainly dependent on irrigation facility by numerable widely distributed tanks during earlier days. Due to drought situations farmers are now mainly depending upon bore wells for their agriculture needs. The number of bore wells in our district is more than 60000.

The uncontrolled exploitation of ground water has led to high fluoride and nitrate in

water. Implication of high fluoride Content: Natural contamination of groundwater by fluoride causes irreparable damage to plant and human health. High oral intake of fluoride results in physiological disorders, skeletal and dental fluorosis, thyroxin changes and kidney damage in humans.

Central Ground Water Board is providing all technical input for effective management of ground water resources in the state. The groundwater scenario compiled on administrative divisions gives a better perspective for planning various ground water management measures by local administrative bodies.

About Department:

The Department of Civil Engineering came into existence as a part of the Institute since its inception in 1986. It offers UG Degree in Civil Engineering with an intake of 120 students and PG in TWO Disciplines (Structural Engineering, Infrastructure Engineering & Management). The Department is actively involved in water quality analysis and soil suitability for irrigation many formers and organisations to come forward for testing and technical guidance.

I take this opportunity to congratulate Central ground water board for the diligent and interaction Programs which will certainly serve as a guiding document for further work and help the farmers,

administrators, academicians, hydrogeologists and engineers to plan the water resources management in a better way in the district.
