

Estd : 1986

||Jai Sri Gurudev||

Sri Adichunchanagiri Shikshana Trust (R.)

SJC INSTITUTE OF TECHNOLOGY

An Autonomous Institution under VTU from 2024-25

AICTE Approved, Accredited by NAAC with A+ Grade & NBA (CSE, ISE, ECE, ME, CV & AE), NIRF(151-300) in 2023,Gold Rated by QS I-Gauge

P.B. No.20, B.B Road, Chikkaballapur - 562 101, Karnataka

www.sjcit.ac.in

I & II Semester
Scheme & Syllabus of B.E. Programme
(ECE)

AICTE

NATIONAL INSTITUTIONAL RANKING FRAMEWORK 151-300

NBA

NAAC A+

QS I-GAUGE GOLD

INSTITUTION'S INNOVATION COUNCIL (Ministry of HRD Initiative) 4-Star Rating

Vision

Preparing Competent Engineering and Management Professionals to Serve the Society

Mission

1. **Providing Students with a Sound Knowledge in Fundamentals of their branch of Study.**
2. **Promoting Excellence in Teaching, Training, Research and Consultancy.**
3. **Exposing Students to Emerging Frontiers in various domains enabling Continuous Learning.**
4. **Developing Entrepreneurial acumen to venture into Innovative areas.**
5. **Imparting Value based Professional Education with a sense of Social Responsibility.**

SJC INSTITUTE OF TECHNOLOGY, CHIKKABALLAPURA

An Autonomous institution Under VTU from 2024 – 2025

AICTE Approved, Accredited by NBA(CSE, ISE, ECE, ME, CV, AE) and NAAC with 'A+' grade, QS – I Gauge Gold Rated

SCHEME OF TEACHING AND EXAMINATION – B.E. EC STREAM (ECE)

(Applicable for students admitted from the Academic Year 2024-25 and onwards)

1st Semester

I SEMESTER: CHEMISTRY CYCLE												
Sl. No.	**Course Code**	**Course Title**	**Course Type**	**TD/PSB**	**Teaching Hours / Week**			**Examination**				
					L	**T**	**P**	**SEE Duration (Hrs)**	**CIE Marks**	**SEE Marks**	**Total Marks**	**Credits**
1	BMATE101	Mathematics-I for EC Stream	ASC(IC)	MAT	2	2	2	**3**	**50**	**50**	**100**	**4**

Engineering Science Course (ESC) – I/II		Emerging Technology Course (ETC)	
Course Code	**Course Title**	**Course Code**	**Course Title**
BESC104A / BESC204A	Fundamentals of Civil Engineering	BETC105A / BETC205A	Introduction to Internet of Things (IOT)
BESC104B / BESC204B	Fundamentals of Electrical Engineering	BETC105B / BETC205B	Introduction to Cyber Security
BESC104C / BESC204C	Introduction to Electronics & Communication	BETC105C / BETC205C	Introduction to Quantum Computing
BESC104D / BESC204D	Fundamentals of Mechanical Engineering	BETC105D / BETC205D	Introduction to AR & VR
BESC104E / BESC204E	Introduction to C Programming	BETC105E / BETC205E	Introduction to Electric and Hybrid Vehicles
		BETC105F / BETC205F	Introduction to xG Communication
Programming Language Course (PLC)		BETC105G / BETC205G	Renewable Energy Sources
BPLC105 / BPLC205	Introduction to Python Programming	BETC105H / BETC205H	Waste Management
		BETC105I / BETC205I	Sustainable Engineering

Credit Definition

1-hour Lecture (L) per week=1Credit	04-Credits courses are to be designed for 50 hours of Teaching-Learning Session
2-hoursTutorial(T) per week=1Credit	04-Credits (IC) are to be designed for 40 hours' theory and 12-14 hours of practical sessions
2-hours Practical / Drawing (P) per week=1Credit	03-Credits courses are to be designed for 40 hours of Teaching-Learning Session
2-hous Skill Development Actives (SDA) per week = 1 Credit	02- Credits courses are to be designed for 25 hours of Teaching-Learning Session
	01-Credit courses are to be designed for 12-15 hours of Teaching-Learning sessions

NOTE:

- The student has to select one course from the ESC-I/II group in 1st semester and one in 2nd semester.
- CS Stream students shall opt for any one of the courses from the ESC-I/II group except, BESC104E / BESC204E -Introduction to C Programming.
- EC Stream students shall opt for any one of the courses from the ESC-I/II group except, BESC104C / BESC204C - Fundamentals of Electronics & Communication.
- ME Stream Students shall opt for any one of the courses from the ESC-I/II group except, BESC104D / BESC204D - Fundamentals of Mechanical Engineering.
- CV Stream Students shall opt for any one of the courses from the ESC-I/II group except, BESC104A / BESC204A - Fundamentals of Civil Engineering
- The students have to opt for the courses from ESC group without repeating the course in either 1st or 2nd semester.
- The students must select one course from ETC group.
- If students study the subject from ETC in 1st semester he/she has to study Introduction to Python Programming in the 2nd semester.
- BMATS101 / BMATS201 / BMATE101 / BMATE201 / BMATM101 / BMATM201 / BMATC101 / BMATC201 shall have the 03 hours of theory examination (SEE), however practical sessions question shall be included in the theory question paper.
- Applied Physics and Applied Chemistry courses of different stream shall have 03 hours of theory examination (SEE) and 02-03 hours of practical examination.
- ESC or ETC of 03 credits Courses shall have only a theory component (L:T:P=3:0:0) or if the nature of the course is practical, then required practical learning syllabus shall be designed as an Integrated course (L:T:P= 2:0:2).
- All 01 Credit courses shall have the SEE of 01 hours duration and the pattern of the question paper shall be MCQ

Abbreviations	Expansions
ASC	Applied Science Course
IC	Integrated Course
ESC	Engineering Science Course
ETC	Emerging Technology Course
PLC	Programming Language Course
AEC	Ability Enhancement Course
HSSMC	Humanity and Social Science & Management Courses
MAT	Mathematics
PHY	Physics
CHE	Chemistry
CS	Computer Science
CSE	Computer Science and Engineering
AIML	Artificial Intelligence and Machine Learning
AI&DS	Artificial Intelligence and Data Science
CSD	Computer Science and Design
ISE	Information Science and Engineering
ME	Mechanical Engineering
CV	Civil Engineering
EC	Electronics and Communication
ECE	Electronics and Communication Engineering
AE	Aeronautical Engineering
ASE	Aero Space Engineering
RED	Respective Engineering Department
HSS	Humanity and Social Science
HSSM	Humanity and Social Science & Management
CHE	Chemistry
SEE	Semester End Examination
CIE	Continuous Internal Evaluation
TD	Teaching Department
PSB	Paper Setting Board
ABA	Activity Based Assessment

Rubrics for CIE of Theory, Integrated and Laboratory based courses

CIE Assessment Pattern – Theory-based Courses

Components		Number	Weightage	Max. Marks	Min. Marks
(i)	Tests (A)	2	60%	30	12
(ii)	Quizzes (B)	2	20%	10	04
(iii)	Activity Based Assessment [ABA] (C)	1	20%	10	04
	Total Marks			**50**	**20**

Final CIE Marks = (A) + (B) + (C)

(i) The minimum CIE marks requirement is 40% of maximum marks in each component.
(ii) In Courses where Quizzes (B) and ABA (C) are not the components of assessment pattern, then, Tests (A) will have 100% weightage (50 Marks).
(iii) In Courses where Quizzes (B) is not the component of assessment pattern, then, Tests (A) will have 60% weightage (30 Marks) and ABA will have 40% weightage (20 Marks).
(iv) In Courses where ABA (C) is not the component of assessment pattern, then, Tests will have 60% weightage (30 Marks) and Quizzes (B) will have 40% weightage (20 Marks)

CIE Assessment Pattern – Integrated Courses

Components		Number	Weightage	Max. Marks	Min. Marks
Theory	Tests (A)	2	60%	30	12
Laboratory	Class work (B)	Continuous	20 %	10	04
	Open Ended Experiment/Project Based Learning (PBL)/Model demonstration/Experiential Learning (B)	1#			
	Test (C)	1	20 %	10	04
	Total Marks			**50**	**20**

Mandatory for 2nd and 3rd year integrated courses

Final CIE Marks = (A) + (B) + (C)

CIE Assessment Pattern – Laboratory-based Courses

Applicable to all laboratory-based, activity-based and experiential learning courses viz., Social Innovation, Engineering Exploration, Career Electives (Add-on Courses) etc.

Components		Number	Weightage	Max. Marks	Min. Marks
(i)	Class Work (A)	Continuous	50%	25	10
(ii)	Lab Test (B)	1	30%	15	06
(iii)	Open Ended Experiment/Project Based Learning (PBL)/Model demonstration/Experiential Learning (C)	1	20%	10	04
Total Marks				**50**	**20**

Final CIE Marks = (A) + (B) + (C)

(i) In Courses where Lab Test (B) and Open-Ended Experiments (C) are not the components of assessment pattern, then, Class Work (A) will have 100% weightage (50 Marks).
(ii) In Courses where Open-Ended Experiments (C) is not the component of assessment pattern, then, Class Work (A) will have 60% weightage (30 Marks) and Lab Test (B) will have 40% weightage (20 Marks).

Semester: I						
Mathematics-I for EC Stream **Stream: ECE**						
Course Code	**:**	**BMATE101**		**Credits**	**:**	4
Hours/Week(L:T:P)	**:**	2:2:2		**CIE**	**:**	50Marks
Total Hours	**:**	40L+12P		**SEE**	**:**	50Marks
Course Type	**:**	ASC(IC)		**SEE Duration**	**:**	3 Hours

Prerequisites:	
Courses	
Knowledge on Fundamental Concepts	**Basic Differentiation, Integration, Matrix**
Knowledge on Connected Tools (If any)	**Basic computer knowledge**

Course Learning Objectives: This course will enable the students to	
CLO1	Familiarize the importance of calculus associated with one variable and multivariable for Electrical and Electronics engineering.
CLO2	Analyse Electrical and Electronics engineering problems by applying Ordinary Differential Equations.
CLO3	Apply the Integral Calculus that is essential in Electrical and Electronics engineering.
CLO4	Develop the knowledge of Linear Algebra to solve the system of equations.
CLO5	Learn making use of modern mathematical tools namely MATHEMATICA / MATLAB / PYTHON/ SCILAB to find the solution in Calculus, Differentiation and Matrix concepts.

Module – 1	**08Hrs**

Differential Calculus:
Polar coordinates, Polar curves, angle between the radius vector and the tangent, angle between two curves and problems. Pedal equations and problems. Curvature and Radius of curvature – Cartesian and Polar forms- Problems.

Application: Problems involving the analysis of polar curves.

Self-study: Center and circle of curvature, evaluates and involutes. Applications of Computer graphics, Image processing. (RBT Levels: L1, L2 and L3)

Text Book 1: Ch 4: 4.7, 4.8,4.10 - 4.13.
Text Book 2: Ch 2: 2.10, 2.40, 2.44, 2.61.

Module – 2	**08Hrs**

Series expansion and Multivariable Calculus:
Maclaurin's series expansion for one variables (statement only) – problems, Partial differentiation, total derivative - differentiation of composite functions, Jacobian, Method of Lagrange's undetermined multipliers-Problems.

Application: Maxima and Minima for a function of two variables

Self-study: Taylor's series expansion for one variable, Euler's theorem and problems.
(RBT Levels: L1, L2 and L3)

Text Book 1: Ch 4: 4.3(4), 4.4, Ch 5: 5.2, 5.4(2), 5.5, 5.6, 5.7, 5.11, 5.12.
Text Book 2: Ch 3: 3.5, 3.11, 3.13, 3.18, 3.22, Ch 4: 4.1, 4.5, 4.10.

Module – 3	**08 Hrs**

Ordinary Differential Equations (ODEs) of First Order:

Linear and Bernoulli's differential equations. Exact and reducible to exact differential equations – Integrating factors on $\frac{1}{M}\left(\frac{\partial M}{\partial y}-\frac{\partial N}{\partial x}\right)$ and $\frac{1}{N}\left(\frac{\partial M}{\partial y}-\frac{\partial N}{\partial x}\right)$. Orthogonal trajectories: Cartesian and polar form.

Non-linear differential equations: Introduction to general and singular solutions, Solvable for p only, Clairaut's equation, Reducible to Clairaut's equation-Problems.

Application: Applications of ordinary differential equations: L-R circuits.

Self-Study: Newton's law of cooling. (RBT Levels: L1, L2 and L3)

Text Book 1: Ch 11: 11.13, 11.14, 11.9, 11.10, 11.11, 11.12(4), 12.3, 12.6.
Text Book 2: Ch 8: 8.10, 8.11, 8.12, 8.19, 8.22, 8.39, 8.50, 9.59.

Module – 4	**08 Hrs**

Integral Calculus:

Evaluation of double and triple integrals, evaluation of double integrals by change of order of integration, changing into polar coordinates- Problems. Applications to find Area and Volume by double integral.

Beta and Gamma functions: Definitions, properties, relation between Beta and Gamma functions. Problems.

Application: solve real-world problems related to area, volume, and advanced mathematical relations.

Self-Study: Centre of gravity, Duplication formula.(RBT Levels: L1, L2 and L3)

Text Book 1: Ch 7: 7.1, 7.2, 7.3, 7.5, 7.14, 7.15, 7.16, 7.6, 7.8.
Text Book 2: Ch 6: 6.45, Ch 7: 7.1, 7.4, 7.12, 7.14, 7.21

Module – 5	**08 Hrs**

Elementary Linear Algebra

Rank of Matrices: Rank of a matrix by Echelon form, Consistency of system of linear equations- Homogeneous and non-homogeneous equations, Gauss-Jordan, Gauss-Seidel methods. Finding largest eigenvalue and corresponding eigenvector by Rayleigh's power method.

Application: Finding the linear dependence and independence of the vectors.

Self-Study: Inverse of a square matrix by Cayley- Hamilton theorem. (RBT Levels: L1, L2 and L3).

Text Book 1: Ch 2: 2.7(1), 2.10(1,3), 2.12, 2.15, Ch 28: 28.6(1,2), 28.7(2).
Text Book 2: Ch 13: 13.3, 13.17, Ch 14: 14.1, 14.9.

Course Outcomes: After completing the course, the students will be able to	
CO1	Describe the basic ideas and solve problems related to Polar curves, Radius of curvature.
CO2	Solve problems pertaining to engineering applications using your acquired understanding of differential calculus, partial differentiation.
CO3	Examine the solutions to the problems by applying various known methods of differential equation.
CO4	Solve the system of linear equations and compute Eigen values and Eigen vectors using matrix.
CO5	Familiarize with modern mathematical tools namely MAXIMA/MATLAB/ PYTHON

Text Books

Applied Chemistry for EC Stream **Stream : ECE**						
Course Code	**:**	BCHEE102		**Credits**	**:**	4
Hours/Week(L:T:P)	**:**	2:2:2		**CIE**	**:**	50Marks
Total Hours	**:**	40L+12P		**SEE**	**:**	50Marks
Course Type	**:**	ASC(IC)		**SEE Duration**	**:**	3 Hours

Prerequisites:	
Courses	Applied Chemistry
Knowledge on Fundamental Concepts	Semi conductors, Insulators, Polymers, Energy Storage, Electrochemical reactions of metals, E-waste management, Nano chemistry, Display Devices & Sensors
Knowledge on Connected Tools (If any)	**-**

Course Learning Objectives: This course will enable the students to	
CLO1	Learn chemical properties of semiconductors and their impact on electronic component performance.
CLO2	Understand chemical reactions/processes in manufacturing and functioning of electronic components like Display system and batteries.
CLO3	Gain knowledge to select and design corrosion protection methods, including coatings and material selection.
CLO4	Enhance knowledge of emerging materials and technologies in electronics, including nanomaterials, and flexible electronics, and their chemical implications.
CLO5	Develop skills in using analytical techniques to assess material properties and performance, including optical sensors and pH meters

Module – 1 **Chemistry of Electronic Materials**	**08Hrs**
Conductors and Insulators: Introduction, principle with examples. **Semiconductors:** Introduction, production of electronic grade silicon-Czochralski process (CZ) and Float Zone(FZ)methods. **Polymers:** Introduction, Molecular weight of polymer- Number average, Weight average and numerical problems. Conducting polymers– synthesis and conducting mechanism of polyacetylene. Preparation, properties and commercial applications of graphene oxide. **Polymer Composites:** Kevlar Fibre-Synthesis, properties & applications. **Metal finishing:** Introduction, Technological importance, Electroless plating – Introduction, Electroless plating of copper in the manufacture of double-sided PCB. **Self-learning:** Electroplating process and distinction between electroplating and electrolessplating	
Text Book 1: Ch-13.6, 13.7, 18.9 **Text Book 3: Ch-3**	

Module – 2 **Energy Conversion and Storage Devices**	**08Hrs**

Batteries: Introduction, classification of batteries. Components, construction, working and applications of modern batteries; Na-ion battery, solid state battery (Li-polymer battery) and flow battery (Vanadium redox flow battery).

Fuel Cells: Introduction, Advantages, Differences between fuel cells & conventional cells. Construction, working and applications of methanol–oxygen and Polymer electrolyte membrane (PEM) fuel cell.

Solar Energy: Introduction, importance of solar PV cell, construction and working of solar PV cell, advantages and disadvantages.

Solar cell Design: Module, Panels & arrays.

Self-learning: Electrodes for electrostatic double layer capacitors, pseudo capacitors, and hybrid capacitor.

Text book 1: Ch- 7.12,
Text book 2: Ch- 6.9, 6.10

Module – 3 **Corrosion Science and E-waste Management**	**08 Hrs**

Corrosion: Introduction, electrochemical theory of corrosion, types of corrosion-differential metal, differential aeration (waterline and pitting)

Corrosion control: Metal coating-galvanization, cathodic protection-Impressed current method. Corrosion penetration rate (CPR)-Introduction & numerical problems.

E-waste Management: Introduction, sources, effects of e-waste on environment and human health, methods of disposal, Recycling methods- Hydrometallurgy & Pyrometallurgy, advantages of recycling. Extraction of copper and gold from e-waste.

Self-learning: Recycling of PCB and battery components

Text book 1: Ch-18.1, 18.3, 18.4, 18.7, 20.9
Text book 3: Ch-3.5

Module – 4 **Nanomaterials and Display Systems**	**08 Hrs**

Nanomaterials: Introduction, size dependent properties of nanomaterials (Surface area, Catalytic, Conducting), preparation of nanomaterials by sol-gel method with example. Introduction, properties and applications of Nanofibers, Nanophotonics, Nanosensors.

Display Systems: Liquid crystals (LC's)-Introduction, classification, properties and application in Liquid Crystal Displays (LCD's).

Properties and application of Organic Light Emitting Diodes (OLED's) and Quantum Light emitting diodes (QLED's).

Perovskite Materials: Introduction, properties and applications in optoelectronic devices.

Self-learning: Properties & electrochemical applications of carbon nanotubes and graphene.

Text book 1: Ch-22.1
Text book 3: Ch-4.3

Module – 5 **Sensors and Electrode systems**	**08 Hrs**
Sensors: Introduction, working principle and applications of Conductometric sensors, Electrochemical sensors, determination of DO using Electrochemical sensors, Thermometric sensors, and Optical sensors. **Electrode System:** Introduction, Reference electrodes -Introduction, calomel electrode–construction, working and applications of calomel electrode. **Ion selective electrode**– definition, construction, working and applications of Glass electrode. Determination of pH using glass electrode. **Concentration cell**– Definition, construction & numerical problem. **Self-learning:** Sensors used in Medical & environmental applications**.**	
Text book 1: Ch-7.11 **Text book 2: Ch-6.7, 6.13** **Text book 3: Ch-5.1, 5.2, 5.3**	

Course Outcomes: After completing the course, the students will be able to	
CO1	Identify the terms and processes involved in scientific and engineering applications
CO2	Explain the phenomena of chemistry to describe the methods of engineering processes
CO3	Solve for the problems in chemistry that are pertinent in engineering applications
CO4	Apply the basic concepts of chemistry to explain the chemical properties and processes
CO5	Analyze properties and processes associated with chemical substances in multidisciplinary situations.

Semester: I/II						
Course Title: Computer-Aided Engineering Drawing **Stream: ME (Common to all the branches)**						
Course Code	**:**	**BCED103/ BCED203**		**Credits**	**:**	3
Hours/Week (L: T:P)	**:**	2:0:2		**CIE**	**:**	50Marks
Total Hours	**:**	40 L		**SEE**	**:**	50Marks
Course Type	**:**	ESC		**SEE Duration**	**:**	3 Hours

Prerequisites:	
Courses	**Nil**
Knowledge on Fundamental Concepts	**Nil**
Knowledge on Connected Tools (If any)	**Nil**

Course Learning Objectives: This course will enable the students to	
CLO1	Understand the basic principles and conventions of engineering drawing
CLO2	Use drawing as a communication mode
CLO3	Generate pictorial views using CAD software
CLO4	Gain the knowledge about the development of surfaces
CLO5	Visualize engineering components

Module – 1	**08 Hrs**
Introduction to Engineering drawing Drawing Instruments and their uses, relevant BIS conventions and standards. Lettering, line conventions, dimensioning, material conventions, and free hand practicing. Co- ordinate system and reference planes HP, VP, RPP & LPP of 2D/3D environment. Selection of drawing sheet size and scale. Commands and creation of Lines, coordinate points, axes, poly-lines, square, rectangle, polygons, splines, circles, ellipse, text, move, copy, off-set, mirror, rotate, trim, extend, break, chamfer, fillet, curves, constraints viz., tangency, parallelism, inclination and perpendicularity. Orthographic Projections: Planes of projection. **Projections of points** in all the four quadrants. **Projections of Straight lines** True length and True inclinations of a line, Apparent length and apparent inclinations of a line. Projection of straight line inclined to both the planes **Text Book 1: Ch 1, Ch 2, Ch 3** **Text Book 2: Ch 1, Ch 2, Ch 3**	
Module – 2	**08 Hrs**
Projections of Plane Surfaces Introduction to projection of plane surfaces, Projection of Triangular, Square, Rectangular, Pentagonal, Hexagonal and Circular planes inclined to horizontal and vertical planes. **Text Book 1: Ch 3** **Text Book 2: Ch 12**	
Module – 3	**08 Hrs**

Projections of Solids

Introduction to Projections of Solids, Projections of Right Regular Prisms- Square, Pentagonal & Hexagonal. Pyramids- Square, Pentagonal & Hexagonal, Cone, Tetrahedron and Hexahedron (Cube) inclined to both the planes.

Text Book 1: Ch 3

Text Book 2: Ch 14

Module – 4	**08 Hrs**

Isometric Projection

Introduction, Isometric scale, Isometric projection of simple plane figures, Isometric projection of hexahedron (cube), right regular prisms, pyramids, cylinders, cones, Hemisphere and spheres. Isometric projection of combination of two solids.

Development of lateral surfaces

Development of lateral surfaces of right regular prisms- Triangular, Square, Pentagonal & Hexagonal. Cylinders, pyramids- Triangular, Square, Pentagonal & Hexagonal and cones resting with base on HP only.

Text Book 1: Ch 4

Text Book 2: Ch 17 Ch 15

Module – 5	**08 Hrs**

Application Problems and Multidisciplinary Exercises (CIE only)

Application of projection of lines, Planes, Solids; Problems on application of isometric projections and development of lateral surfaces.

Free hand sketching: True freehand, guided freehand, roads, buildings, utensils, hand tools and furniture etc.

Graphs and charts: Column chart, Pie chart, Line chart, Gantt chart etc.. using Microsoft excel or suitable software.

Text Book 1: Ch 5

Text Book 2: Ch 20

Course Outcomes: After Completing the Course, the students will be able to	
CO1	Draw and communicate the objects with definite shape and dimensions
CO2	Recognize and draw the shape and size of objects through different views
CO3	Develop the lateral surfaces of the object
CO4	Create a Drawing views using CAD software
CO5	Illustrate the interdisciplinary engineering components or systems through its graphical representation.

Semester: I / II						
COURSE TITLE: FUNDAMENTALS OF CIVIL ENGINEERING **Stream: CV**						
Course Code	**:**	**BESC104A/BESC204A**		**Credits**	**:**	03
Hours/Week (L: T: P)	**:**	3: 0: 0		**CIE**	**:**	50 Marks
Total Hours	**:**	40 L		**SEE**	**:**	50 Marks
Course Type	**:**	ESC		**SEE Duration**	**:**	03 Hours

Prerequisites:	
Courses	Physics and Mathematics
Knowledge on Fundamental Concepts	Force, Gravity, Differentiation & Integration.
Knowledge on Connected Tools (If any)	NA

Course Learning Objectives: This course will enable the students to	
CLO1	Make students learn the scope of various specializations of civil engineering.
CLO2	Develop students' ability to analyze the problems involving forces, moments with their applications.
CLO3	Develop the student's ability to find out the center of gravity and moment of inertia and their applications.
CLO4	Make students learn the concepts of sustainable infrastructure.

Module – 1	**08 Hrs**
Civil Engineering Disciplines and Building Science **Introduction to Civil Engineering:** Surveying, Structural Engineering, Geotechnical Engineering, Hydraulics & Water Resources Engineering, Transportation Engineering, Environmental Engineering, Construction planning &Project management. **Basic Materials of Construction:** Bricks, Cement & mortars, Plain, Reinforced & Pre-stressed Concrete, Structural steel, Construction Chemicals. **Structural elements of a building:** Foundation, Plinth, Lintel, Chejja, Masonry Wall, Column, Beam, Slab and Staircase. **Text Book 1: Ch 1: 1.1 – 1.4, 1.9** **Text Book 2: Ch 1: pp-1-20**	
Module – 2	**08 Hrs**
Concurrent system of forces: Introduction, Basic idealization, Definition of a force, Classification of system of forces, Principle of Transmissibility, Principle Physical Independence, Principle of superposition, Resolution of forces, Composition of forces, Resultant and Equilibrant. Parallelogram law of forces. Numerical examples on Resultant of Concurrent	

Coplanar System of Forces.

Non-concurrent system of forces: Moment of a force, Varignon's theorem of moments, Couples and their characteristics. Determination of Magnitude, Direction and Position of Resultant of Non-concurrent Coplanar System of Forces- Numerical examples.

Text Book 1: Ch 4: 4.1 – 4.10, Ch-5: 5.1 – 5.5
Text Book 2: Ch: 2 – 4

Module – 3	**08 Hrs**

Equilibrium of system of forces: Definition, Conditions of Equilibrium for Concurrent Coplanar System of Forces, Lami's theorem. Numerical examples. Types of Beams, Types of Loadings, Types of Supports, Conditions of Equilibrium for Non Concurrent Coplanar System of Forces, Determination of support reactions for statically determinate beams.

Text Book 1: Ch 6: 6.1 – 6.11, Ch 8: 8.1 – 8.5
Text Book 2: Ch 5 – 6

Module – 4	**08 Hrs**

Centroid and Centre of Gravity: Definition, Derivation of expressions for centroidal distances of simple planar laminas like rectangle, triangle, Quarter, and Semi-circle. Determination of centroidal distances of compound laminas.

Moment of Inertia: Introduction, Theorems of perpendicular and parallel axis. Concept of axis of symmetry. Derivations of expressions for moment of inertia of simple planar laminas like Rectangle, Triangle, Circle, Semi-Circle and Quadrant of a Circle, Definitions of polar moment of inertia, Radius of gyration, Determination of moment of inertia, polar moment of inertia, radius of gyration of compound laminas about centroidal axes and about any specified reference line.

Text Book 1: Ch 10: 10.1 – 10.4, Ch 11: 11.1 –11.8
Text Book 2: Ch 9 – 10

Module – 5	**08 Hrs**

Societal and Global Impact of Infrastructure

Infrastructure: Introduction to sustainable development goals, Smart city concept, Clean city concept, Safe city concept.

Environment: Water Supply and Sanitary systems, Urban air pollution management, Solid waste management, Identification of Landfill sites, urban flood control

Built-environment: Energy efficient buildings, Recycling, Temperature and Sound control in Buildings, Security systems; Smart buildings.

Text Book 3: Unit 3: 3.1 – 3.4, Unit 5: 5.1 – 5.3

Course Outcomes: After completing the course, the students will be able to	
CO1	Comprehend the scope of various disciplines of Civil Engineering.
CO2	Compute the Resultant of concurrent and non-concurrent system of forces.
CO3	Analyze the system of forces for support reactions and member forces.

CO4	Locate the centroid and moment of inertia of plane and built-up sections.
CO5	Expose the infrastructure requirement for sustainable development.

Semester: I/II						
Fundamentals of Electrical Engineering **Stream: ECE (Common to all the branches)**						
Course Code	**:**	BESC104B / BESC204B		**Credits**	**:**	3
Hours/Week (L:T:P)	**:**	3:0:0		**CIE**	**:**	50 Marks
Total Hours	**:**	40L		**SEE**	**:**	50 Marks
Course Type	**:**	ESC		**SEE Duration**	**:**	3 Hours

Prerequisites:	
Courses	**General Physics:** Electromagnetism, modern physics, emphasizing electric fields, magnetic fields and circuits
Knowledge on Fundamental Concepts	Knowledge of resistors, capacitors, inductors, and their behaviour in circuits. Knowledge of complex number operations and polar forms. Knowledge of Electromagnetism
Knowledge on Connected Tools (If any)	NA

Course Learning Objectives: This course will enable the students to	
1	Introduce the concepts of electrical circuits and its component
2	Understand DC circuits and AC single phase & three phase circuits.
3	Explain the construction and operation of transformers and induction motors.
4	Introduce concepts of circuit protecting devices and earthing.
5	Interpret the Concepts of Electric Vehicles.

Module – 1	**08 Hrs**

Introduction: Charge, Voltage, Basic circuit, Units and Symbol

Text Book 1: Ch1: 1.1,1.2,1.3,1.4

DC Circuits: Ohm's Law and its limitations. KCL & KVL, series, parallel, series- parallel circuits, Power and energy, Numerical problems (Numerical problems on KCL and KVL can be solved using Branch current method). **Text Book 2: Ch 2: 2.1,2.2,2.3.6**

DC Generator: Principle of operation, constructional details, Emf equations, Numericals

Text Book 2: Ch 26 :26.1,26.3,26.33

DC Motor: Principle of operation, back emf and its significance, Torque equation. types (shunt and series) Numericals (**Text Book 2**: **Ch 29**:**29.1,29.3,29.6,29.17)**

Module – 2	**08 Hrs**

AC Fundamentals: Equation of AC Voltage and current, waveform, time period, frequency, amplitude, phase, phase difference, average value, RMS value, form factor, peak factor.

AC Circuits: Analysis of R, L, C, R-L, R-C and R-L-C circuits with phasor diagrams, Real power, reactive power, apparent power, and Power factor, Simple Numerical.

Text Book 1: Ch 9:9.1,9.2, 9.3,9.5,10.1,10.2,10.3,10.6

Module – 3	08 Hrs

Three-phase AC circuits: Necessity and advantage of 3-phase system. Generation of 3-phase power. Definition of phase sequence. Relationship between line and phase values of balanced star and delta connections. Power in balanced 3-phase circuits. Simple Numerical.
Text Book 1: Ch 12: 12.3,12.4,12.6,12.7,12.8,12.9

Module – 4	08 Hrs

Single Phase Transformers: Construction and principle of operation, emf equation, losses, variationin losses with respect to load, efficiency, condition for maximum efficiency, illustrative examples.

Text Book 2: Ch 32: 32.1,32.2,32.3,32.4,32.6,32.8,32.30

Three-phase Induction Motors: Concept of rotating magnetic field, Principle of operation, constructional features of motor, types - squirrel cage and wound rotor, slip and problems on the slip, significance of slip, applications. **Text Book 2: Ch 34:34.3,34.4,34.6,34.10,34.11**

Module – 5	08 Hrs

Domestic Wiring: Requirements, Types of wiring: casing, capping. Two way and three way control of load.
Equipment Safety measures: Working principle of Fuse and Miniature circuit breaker (MCB), merits and demerits.
Personal safety measures: Electric Shock, Earthing and its types, Safety Precautions to avoid shock.
Text Book1:Ch 19: 19.6,19.8,19.9,19.10
Introduction to Electric Vehicles: EV System, EV History, Electric Vehicles and the Environment, EV Advantages, Block diagram of Electric Vehicle. **Text book3: Chapter1**

Course Outcomes: After completing the course, the students will be able to	
CO1	Understand the fundamental concepts of DC, AC circuits and Electrical Machines
CO2	Apply the basic electrical laws to solve AC and DC circuits.
CO3	Analyze the behavior of circuit elements in single phase and 3 phase AC Circuits.
CO4	Interpret the Concepts of Electric Vehicles, Protective Devices & personal Safety Measures.
CO5	Engage in individual/team work to make effective technical presentation on electrical concepts and communicate effectively to the audience

Semester: I/II						
Introduction to Electronics & Communication **Stream:** ECE						
Course Code	**:**	BESC104C/ BESC204C		**Credits**	**:**	3
Hours/Week(L:T:P)	**:**	3:0:0		**CIE**	**:**	50 Marks
Total Hours	**:**	40L		**SEE**	**:**	50 Marks
Course Type	**:**	ESC		**SEE Duration**	**:**	3 Hours

Prerequisites:	
Courses	Physics
Knowledge on Fundamental Concepts	Basics of Diodes, Transistors and Boolean Algebra.
Knowledge on Connected Tools (If any)	Multisim/Discrete components

Course Learning Objectives: This course will enable the students to	
1	Prepare students with fundamental knowledge/ overview in the field of Electronics and Communication Engineering.
2	Equip students with a basic foundation in electronic engineering required for comprehending the operation and application of electronic circuits, logic design, embedded systems, and communication systems.
3	Inculcate in first-year engineering students an ethical and professional attitude by providing an academic environment inclusive of effective communication, teamwork, ability to relate engineering issues to a broader social context.

Module – 1	**08 Hrs**
Power Supplies: Block diagram, Half-wave rectifier, Full-wave rectifiers and filters, Voltage regulators, Output resistance and voltage regulation, Voltage multipliers. (**Text1: Ch:6**) **Amplifiers –** Types of amplifiers, Gain, Input and output resistance, Frequency response, Bandwidth, Phase shift, Negative feedback, multi-stage amplifiers (**Text 1: Ch:7**)	
Module – 2	**08 Hrs**
Operational amplifiers- Operational amplifier parameters and characteristics, Operational amplifier configurations, Operational amplifier applications (**Text 1: Ch:8**) **Oscillators:** Conditions for oscillation, Ladder network oscillator, Wein bridge oscillator, Multivibrators, Single-stage astable oscillator, Crystal controlled oscillators (Only Concepts, working, and waveforms. No mathematical derivations) (**Text 1: Ch:9**)	
Module – 3	**08 Hrs**
Boolean Algebra and Logic Circuits: Binary numbers, Number Base Conversion, octal & Hexa Decimal Numbers, Complements, Basic definitions, Axiomatic Definition of Boolean Algebra, Basic Theorems and Properties of Boolean Algebra, Boolean Functions, Canonical and Standard Forms, Other Logic Operations, Digital Logic Gates (**Text 2: Ch1: 1.2, 1.3, 1.4, 1.5 Ch2: 2.1, 2.2, 2.3, 2.4, 2.5, 2.6, 2.7**) **Combinational logic:** Introduction, Design procedure, Adders- Half adder, Full adder (**Text 2: Ch:4 4.1, 4.2, 4.3**) **Sequential Logic:** Introduction, flip flops-RS, D, JK and T (**Text 2: Ch6: 6.1,6.2**)	
Module – 4	**08 Hrs**
Embedded Systems: Definition, Embedded systems vs general computing systems, Classification of Embedded Systems, Major application areas of Embedded Systems, Elements of an Embedded System, Core of the Embedded System, Microprocessor vs Microcontroller, RISC vs CISC (**Text 3: Ch1: 1.1,1.2, 1.4, 1.5 Ch:2: 2.1**) **Embedded Systems applications:** Washing Machine, Automotive Domain specific example (**Text 3: Ch:4: 4.1,4.2**)	

Module – 5	08 Hrs
Analog Communication Schemes: Modern communication system scheme, Information source, and input transducer, Transmitter, Channel or Medium – Hardwired and Soft wired, Noise, Receiver, Multiplexing, Types of communication systems. Types of modulation (only concepts) – AM, FM, Concept of Radio wave propagation (Ground, space, sky) (**Text 4: Ch1: 1.2, 1.2.1, 1.3, 1.4, 1.4.1, 1.4.2, 1.5, 1.5.2, 1.6, 1.14, 1.15 Ch2: 2.2, 2.2.1, Ch3: 3.2, 3.2.1**) **Digital Modulation Schemes:** Advantages of digital communication over analog communication, ASK, FSK, PSK, Radio signal transmission Multiple access techniques (**Text 4: Ch:6 6.12, 6A.1.1, Fig. 6A.1, Fig. 6A.3, 6A.1.4, 6A.1.5**)	

Course Outcomes: After completing the course, the students will be able to	
CO1	Compute the parameters and characteristics of operational amplifiers and oscillators
CO2	Design of Boolean algebraic equations and combinational logic circuits & number base conversions
CO3	Summarize the characteristics of embedded systems, sensors and actuators
CO4	Infer analog and digital communication, modulation techniques & radio wave propagation
CO5	Engage in self-study as team member or individual to design and demonstrate simple circuits

Course Code	**:**	**BESC104D/204D**		**Credits**	**:**	3
Hours/Week (L: T:P)	**:**	3:0:0		**CIE**	**:**	50 Marks
Total Hours	**:**	40		**SEE**	**:**	50 Marks
Course Type	**:**	ESC		**SEE Duration**	**:**	3 Hours

Prerequisites:	
Courses	As it is a basic course, course prerequisites are not required.
Knowledge on Fundamental Concepts	Materials, Mechanical Components
Knowledge on Connected Tools (If any)	Nil

Course Learning Objectives: This course will enable the students to	
CLO1	Understand the basic Knowledge on Mechanical Engineering, Fundamentals and Energy Sources.
CLO2	Understand the concept of different types of Machine tool operations and Modern Manufacturing Processes like CNC, 3D printing.
CLO3	Know the working of IC engines and Future Mobility vehicles.
CLO4	Exposure in the field of Engineering Materials and Manufacturing ProcessesTechnology and its applications.
CLO5	Acquire a basic understanding role of Mechanical Engineering in the Robotics and Automation in industry.

Module-1	**08 Hrs.**
Introduction: Role of Mechanical Engineering in Industries and Society- Emerging Trends and Technologies in different sectors such as Energy, Manufacturing, Automotive, Aerospace, and Marine sectors. **Energy**: Introduction and applications of Energy sources like Fossil fuels, nuclear fuels, Power Plants-Hydel, Solar and Wind, Bio-fuels, Environmental issues like Global warming and Ozone depletion. **Text Book 1: Ch1-1.1.1.2,1.3,1.5,1.7,1.9,1.10**	
Module-2	**08 Hrs.**
Machine Tool Operations: Working Principle of lathe, Lathe operations: Turning, facing, knurling. Working principles of Drilling Machine, drilling operations: drilling, boring, reaming. Working of Milling Machine, Millingoperations: Plane milling and Slot milling. (No sketches of machine tools, sketches to be used only for explaining the operations). **Introduction to Advanced Manufacturing Systems:** Introduction, components of CNC, advantages and applications of CNC and Concept of 3D printing. **Text Book 1: Ch5-5.1,5.2,5.3,5.4,5.7,5.9,5.10,5.12**	
Module–3	**08 Hrs.**
Introduction to IC Engines: Components and Working Principles, 4-Strokes Petrol and Diesel Engines,Application of IC Engines. **Insight into Future Mobility;** Electric and Hybrid Vehicles, Components of Electric and Hybrid Vehicles. Advantages and disadvantages of EVs and Hybrid vehicles. **Text Book 1: Ch3-3.1,3.2,3.5,3.6**	
Module–4	**08 Hrs.**

Engineering Materials: Types and applications of Ferrous & Nonferrous Metals, silica, Ceramics, glass, graphite, diamond and polymer, Composites, Shape Memory Alloys. **Joining Processes**: Soldering, Brazing and Welding, Definitions, classification of welding process, Arc welding, Gas welding and types of flames. **Text Book 1: Ch7-7.2,7.3,7.5,7.9,7.12** **Text Book 2: Ch4-4.1,4.2**
Module–5 **08 Hrs.**
Introduction to Mechatronics and Robotics: open-loop and closed-loop mechatronic systems. Classification based on robotics configuration: Polar, Cylindrical, Cartesian and Jointed Arm Coordinate System, Application, Advantages and Disadvantages. **Automation in industry:** Definition, Types – Fixed, Programmable and Flexible automation, Basic elements with block diagrams, Advantages. **Introduction to IOT**: Definition and Characteristics, Physical Design, Protocols, Logical design of IoT, Functional blocks, and Communication models. **Text Book 2: Ch1-1.8,1.20** **Reference Books 3: Ch1-1.1,1.4 (1.4.1,1.4.2,1.4.3,1.5.2)**

Course Outcomes: After completing the course, the students will be able to	
CO1	Explore the concepts of Role of Mechanical Engineering and Energy sources.
CO2	Describe the Machine Tool Operations and advanced Manufacturing process.
CO3	Illustrate the Working Principle of IC engines and EV vehicles.
CO4	Discuss the Properties of Common Engineering Materials and various Metal Joining Processes.
CO5	Elucidate the fundamental Concepts of Mechatronics, Robotics and Automation in IoT

Text Books	
1	Elements of Mechanical Engineering, K. R. Gopalakrishna, Subhas Publications, 18th Edition. ISBN:5551234002884
2	Elements of Workshop Technology (Vol. 1 and 2), Hazra Choudhry and Nirzar Roy, Media Promoters and Publishers Pvt. Ltd., 2010.
3	Electric and Hybrid Vehicles, Design Fundamentals – Iqbal Husain, CRC Press, 2nd Edition, 2010. ISBN – 13-978-1439811757.

Reference Books

Semester: I / II					
INTRODUCTION TO C PROGRAMMING **(Common to the Branches: CV, ME, AE & ASE)**					
Course Code	**:**	BESC104E / BESC204E	**Credits**	**:**	3
Hours/Week (L: T:P)	**:**	2:0:2	**CIE**	**:**	50 Marks
Total Hours	**:**	40L+12P	**SEE**	**:**	50 Marks
Course Type	**:**	ESC(IC)	**SEE Duration**	**:**	3 Hours

Prerequisites	
Courses	
Knowledge on Fundamental Concepts	Basic Computer Literacy, Programming Fundamentals, Problem-Solving Skills, Mathematics, Development Tools
Knowledge on Connected Tools (If any)	Visual Studio, Code Blocks, GCC, Clang

Course Learning Objectives: This course will enable the students to	
CLO1	Elucidate the basic architecture and functionalities of a computer
CLO2	Familiarize the design of algorithms and flow charts, understanding the fundamentals of C and philosophy of problem solving.
CLO3	Apply programming constructs of C language to solve the real-world problems.
CLO4	Design and Develop Solutions to problems using modular programming constructs such as functions & Arrays
CLO5	Understanding and implementation of simple programs on string, pointers & structures.

Module – 1	**08 Hrs.**
Computers Fundamentals: Introduction to Computers, Input and Output Devices, Computer software and its classification. **Designing Efficient Programs:** Program Design Tools, Types of Errors. **Introduction to C programming:** Basic Structure of a C Program, Files used in C program, Compiling and executing C programs, Character Set, C Tokens, Keywords, Identifiers, Basic Data Types in C, Variables, Constants **Text Book: Ch:1.1-2.2,6.1-6.2,8.4-8.5,9.1-9.13**	
Module – 2	**08 Hrs.**
I/O Statements & Operators in C: Input/ Output Statements in C, Arithmetic Operators, Relational Operators, Logical Operators, Assignment Operators, Increment and Decrement Operators, Conditional Operators, Bitwise Operators, Special Operators, Operator Precedence Chart, Type Conversion and Type Casting. **Text Book: Ch: 9.14, 9.15-9.16**	
Module – 3	**08 Hrs.**
Decision Control and Looping Statements: Introduction to decision control, Conditional branching statements, iterative statements, nested loops, break and continue statements, goto Statement. **Functions:** Introduction, Function declaration, Function definition, Function call, return statements, passing parameters to Function, Scope of Variables, Storage Classes, Recursive Functions. **Text Book: Ch: 10.1-10.6, 11.1-11.10**	

Module – 4	08 Hrs.
Arrays: Introduction, Declaration of arrays, accessing the elements of an array, storing values in arrays, Operations on arrays, two dimensional arrays, operations on two-dimensional arrays, Multidimensional Arrays, Applications of Arrays **Text Book: Ch: 12.1-12.5, 12.7-12.8,12.10,12.12**	
Module – 5	**08 Hrs.**
Strings: Introduction, String Taxonomy, String manipulation functions. **Pointers:** Introduction, Pointer Concepts, Pointer Declaration and Definition, Initialization of Pointer Variables. **Structures and Unions:** Declaration, Initialization, Accessing, differences between structures & unions. **Text Book: Ch: 13.1,13.3,13.5,14.1-14.3,15.1,15.6**	

Course Outcomes: After completing the course, the students will be able to	
CO1	Elucidate the basic architecture and functionalities of a computer and also recognize the hardware parts.
CO2	Demonstrate the use of Operators & Expressions
CO3	Apply logical skills to solve the engineering problems using C programming constructs& functions.
CO4	Explore user-defined data structures like arrays in implementing solutions to problems like searching and sorting
CO5	Demonstrate the use of Modular Programming Constructs involving pointers, Structure & Unions.

CO3	2	3	3	3	2							2
CO4	2	3	3	3								2
CO5	3	2	2	2								2

Laboratory Programs

1. C- Program to convert Kilometers into Meters and Centimeters.
2. C- Program to convert temperature from Fahrenheit to Celsius.
3. Develop a C Program to find the roots of quadratic equation for non-zero co-efficient using if-else ladder construct.
4. Program to check whether a number is an Armstrong number.
5. Write a Program to print prime numbers from 1 to N
6. Develop a C program to read n characters and sort the characters using Bubble sort technique.
7. Develop a C program to read two matrices A (m x n) and B (p x q) and compute the product of the two matrices. Print both the input matrices and resultant matrix with suitable headings and output should be in matrix format only.
8. Write an algorithm and develop a C program to search an integer from N numbers in ascending order using binary searching technique.
9. Write a program in C to convert a decimal number to a binary number using the function.
10. Develop a C program to Check whether a String is Palindrome or not
11. Develop a C program using pointers to compute the sum, mean and standard deviation of all elements stored in an array of N real numbers.
12. C-Program to read, write and Compute average marks and the students scoring above and below the average marks for a class of 'N' students.

Semester: I/II						
Introduction to Internet of Things (IoT) **Stream: EC (Common to all Branch Students)**						
Course Code	**:**	BETC105A/ BETC205A		**Credits**	**:**	3
Hours/Week(L:T:P)	**:**	3:0:0		**CIE**	**:**	50 Marks
Total Hours	**:**	40L		**SEE**	**:**	50 Marks
Course Type	**:**	ETC		**SEE Duration**	**:**	3 Hours

Prerequisites:	
Courses	Basic Electronic Components
Knowledge on Fundamental Concepts	Knowledge about Data, Devices, Analytics, Connectivity, Security, Artificial Intelligence.
Knowledge on Connected Tools (If any)	NA

Course Learning Objectives: This course will enable the students to	
CLO1	Understand about the fundamentals of Internet of Things and its building blocks along with their characteristics
CLO2	Understand the recent application domains of IoT in everyday life
CLO3	Gain insights about the current trends of Associated IoT technologies and IoT Analytics

Module – 1	**08 Hrs**
Basics of Networking: Introduction, Network Types, Layered network models. **Emergence of IoT:** Introduction, Evolution of IoT, Enabling IoT and the Complex Interdependence of Technologies, IoT Networking Components **Textbook1: Ch1: 1.1 to 1.3 Ch4: 4.1 to 4.4**	
Module – 2	**08 Hrs**
IoT Sensing and Actuation: Introduction, Sensors, Sensor Characteristics, Sensorial Deviations, Sensing Types, Sensing Considerations, Actuators, Actuator Types, Actuator Characteristics. **Textbook 1: Ch5: 5.1 to 5.9**	
Module – 3	**08 Hrs**
IoT Processing Topologies and Types: Data Format, Importance of Processing in IoT, Processing Topologies, IoT Device Design and Selection Considerations, Processing Off-loading. **IoT Connectivity Technologies:** LoRa, NB-IoT, WiFi and Bluetooth **Textbook 1: Ch6: 6.1 to 6.5; Textbook 3: Ch4: P134, P144; Textbook2: Ch2: 2.2, 2.3**	
Module – 4	**08 Hrs**
Associated IoT Technologies: Cloud Computing: Introduction, Virtualization, Cloud Models, Service-Level Agreement in Cloud Computing, Cloud Implementation, Sensor-Cloud: Sensors-as-a-Service. **IoT Communication Technologies:** Introduction and Infrastructural. Protocols: IPV4/IPV6 **Textbook1: Ch10:10.1to10.6 Textbook 2: Ch2: 2.1.2.1**	
Module – 5	**08 Hrs**
IoT Case Studies and Future Trends: Vehicular IoT – Introduction, Agricultural IoT – Introduction and Case Studies Health care IoT – Introduction, Case Studies, IoT Analytics – Introduction **Textbook 1: Ch12: 12.1,12.2; Ch13:13.1; Ch14: 14.1-14.2; Ch17: 17.1**	

Course Outcomes: After completing the course, the students will be able to	
CO1	Illustrate the evolution of IoT, IoT networking components, and addressing strategies in IoT
CO2	Understand the significance of various sensing devices and actuator types
CO3	Demonstrate the processing in IoT
CO4	Explain Associated IoT Technologies and IoT Communication Technologies
CO5	Analyze IoT in real world applications

Semester: I/II						
Introduction to Cyber Security **Stream: CS (Common to all the Branches)**						
Course Code	**:**	BETC105B / BETC205B		**Credits**	**:**	3
Hours/Week(L:T:P)	**:**	3:0:0		**CIE**	**:**	50 Marks
Total Hours	**:**	40L		**SEE**	**:**	50 Marks
Course Type	**:**	ETC		**SEE Duration**	**:**	3 Hours

Prerequisites:	
Courses	
Knowledge on Fundamental Concepts	Basic Knowledge of Computers and Mobile Phone Usage
Knowledge on Connected Tools (If any)	NIL

Course Learning Objectives: This course will enable the students to	
CLO1	Understand Cybercrime Fundamentals
CLO2	Explore Cyber Offenses
CLO3	Examine Cybercrime in Mobile and Wireless Contexts
CLO4	Analyze Tools and Methods in Cybercrime
CLO5	Identify Phishing and Identity Theft Techniques

Module – 1	**08 Hrs**
Introduction to Cybercrime: **Cybercrime:** Definition and Origins of the Word, Cybercrime and Information Security, Who are Cybercriminals? Classifications of Cybercrimes, An Indian Perspective, Hacking and Indian Laws, Global Perspectives. **Textbook:1 Chapter 1 (1.1 to 1.5, 1.7-1.9)**	
Module – 2	**08 Hrs**
Cyber Offenses: **How Criminals Plan Them:** Introduction, How criminals plan the attacks, Social Engineering, Cyber Stalking, Cybercafe & cybercrimes. **Botnets:** The fuel for cybercrime, Attack Vector. **Textbook:1 Chapter 2 (2.1 to 2.7)**	
Module – 3	**08 Hrs**
Cybercrime: Mobile and Wireless Devices: Introduction, Proliferation of mobile devices, Trends in Mobility, credit card frauds in mobile and wireless computing era, security challenges posed by mobile devices, Registry settings in mobile devices. attacks on mobile/cell phones. **Textbook:1 Chapter 3 (3.1 to 3.6, 3.8)**	
Module – 4	**08 Hrs**
Tools and Methods used in Cybercrime: Introduction, Proxy Servers, Anonymizers, Phishing, Password Cracking, Key Loggers and Spywares, Virus and Worms, Trojan Horses and Backdoors, Steganography, DoS and DDOS Attacks, Attacks on Wireless networks. **Textbook:1 Chapter 4 (4.1 to 4.9, 4.12)**	

Module – 5	08 Hrs
Phishing and Identity Theft: Introduction, methods of phishing, phishing techniques, spear phishing, types of phishing scams, phishing toolkits and spy phishing, counter measures, Identity Theft. **Textbook:1 Chapter 5 (5.1. to 5.3)**	

Course Outcomes: After completing the course, the students will be able to	
CO1	**Define** and classify various types of cybercrimes
CO2	**Analyze** the planning and execution of cyber offenses
CO3	**Assess** security challenges associated with mobile and wireless devices,
CO4	Illustrate Tools and Methods used on Cybercrime
CO5	**Explore** the techniques of phishing and identity theft.

Semester: I/II					
INTRODUCTION TO QUANTUM COMPUTING **Stream: CS (Common to all the branches)**					
Course Code	**:**	BETC105C / BETC205C	**Credits**	**:**	3
Hours/Week(L:T:P)	**:**	3:0:0	**CIE**	**:**	50Marks
Total Hours	**:**	40L	**SEE**	**:**	50Marks
Course Type	**:**	ETC	**SEE Duration**	**:**	3 Hours

Prerequisites:	
Courses	
Knowledge on Fundamental Concepts	Basic understanding of Algorithms, cryptography, physics and mathematics.
Knowledge on Connected Tools (If any)	

Course Learning Objectives: This course will enable the students to	
CLO1	Develop a foundational understanding of classical and quantum computational models, with an emphasis on the mathematical frameworks of linear algebra
CLO2	Equip students with a deep understanding of the principles of quantum mechanics as they apply to quantum information
CLO3	Introduce students to advanced quantum communication protocols and algorithms
CLO4	Provide students with a comprehensive understanding of error correction techniques in both classical and quantum computing
CLO5	Explore the principles and techniques of quantum information theory and cryptography

Module-1	**08Hrs**
Introduction And Background: Overview, Computers and the Strong Church–Turing Thesis, The Circuit Model of Computation, A Linear Algebra Formulation of the Circuit Model, A Linear Algebra Formulation of the Circuit Model, A Preview of Quantum Physics, Quantum Physics and Computation **Linear Algebra And The Dirac Notation:** The Dirac Notation and Hilbert Spaces**,** Dual Vectors, Operators, The Spectral Theorem, Functions of Operators, Tensor Products, The Schmidt Decomposition Theorem. **Text Book1: Chapter 1,2**	
Module–2	**08Hrs**
Qubits And The Framework Of Quantum Mechanics : The State of a Quantum System, Time-Evolution of a Closed System, Composite Systems, Measurement, Mixed States and General Quantum Operations **A Quantum Model Of Computation:** The Quantum Circuit Model, Quantum Gates, Universal Sets of Quantum Gates, Universal Sets of Quantum Gates, Implementing Measurements with Quantum Circuits. **Text Book1: Chapter 3,4**	
Module–3	**08 Hrs**
Superdense Coding And Quantum Teleportation: Superdense Coding, Quantum Teleportation, An Application of Quantum Teleportation **Quantum algorithms**:, Phase Kick-Back, The Deutsch Algorithm, The Deutsch–Jozsa Algorithm, Simon's Algorithm, Grover's Quantum Search Algorithm **Text Book1: Chapter 5, Chapter 6- 6.1,6.2,6.3,6.4 6.5 , Chapter 8-8.1**	

Module–4	08 Hrs
Quantum Error Correction: Classical Error Correction, The Classical Three-Bit Code, Fault Tolerance, Quantum Error Correction, Three- and Nine-Qubit Quantum Codes. **Text Book 1: Chapter 10**	
Module–5	**08 Hrs**
Quantum information theory and cryptography: Data compression, Classical information over noisy quantum channels, Quantum information over noisy quantum channels, Quantum cryptography. **Text Book 2: Chapter 12-12.2,12.3,12.4,12.6**	

Course Outcomes: After completing the course, the students will be able to	
CO1	Apply the principles of the Church-Turing Thesis and the Circuit Model in both classical and quantum.
CO2	Describe the state and evolution of quantum systems, design quantum circuits using a universal set of quantum gates
CO3	Explain and implement quantum communication techniques like superdense coding and quantum teleportation
CO4	Compare classical and quantum error correction methods, design and implement fault-tolerant quantum systems
CO5	Apply quantum information theory to data compression and demonstrate proficiency in quantum cryptographic techniques

Semester: I / II					
Introduction to AR & VR **Stream: CS (Common to all the branches)**					
Course Code	**:**	BETC105D / BETC205D	**Credits**	**:**	3
Hours/Week(L:T:P)	**:**	3:0:0	**CIE**	**:**	50 Marks
Total Hours	**:**	40L	**SEE**	**:**	50 Marks
Course Type	**:**	ETC	**SEE Duration**	**:**	3 Hours

Prerequisites :	
Courses	Mathematics, Basics of Computer.
Knowledge on Fundamental Concepts	In geometry, a three-dimensional space is a mathematical space in which three values are required to determine the position of a point. Working principles of computer
Knowledge on Connected Tools (If any)	Software, Hardware

Course Learning Objectives:	
CLO1	Designed to give historical and modern overviews and perspectives on virtual reality.
CLO2	It describes the fundamentals of sensation, perception, technical and engineering aspects of virtual reality systems.
CLO3	To understand and design the various geometrical shapes of the objects using tools.
CLO4	Explain the concepts of motion and tracking in VR systems.
CLO5	Describe the importance of interaction and audio in VR systems
CLO6	To provide a foundation to the fast growing field of AR and make the students aware of the various AR devices

Module -1	**08 Hrs**
Introduction: What Is Virtual Reality? Modern VR Experiences, History Repeats, Bird's-Eye View, Hardware, Software, Human Physiology and Perception. **TextBook-1: Chapter 1: 1.1,1.2,1.3 chapter 2: 2.1, 2.2, 2.3**	
Module – 2	**08 Hrs**
The Geometry of Virtual Worlds &The Physiology of Human Vision: Geometric Models, Changing Position and Orientation, Axis-Angle Representations of Rotation, Viewing Transformations, Chaining the Transformations. **Case studies:** Installation of Unity tools and Visual Studio, setting up Unity for VR development, understanding documentation of the same. **TextBook-1: Chapter 3: 3.1, 3.2, 3.3, 3.4,3.5**	
Module – 3	**08 Hrs**
Human Eye, eye movements & implications for VR. Evaluating VR Systems and Experiences, Perceptual Training, Recommendations for Developers, Comfort and VR Sickness. **Case studies:** Develop a scene in Unity that includes: A cube, plane and sphere, apply transformations on the 3 game objects. **TextBook-1: Chapter 5:5.1,5.2,5.3,5.4 chapter 12:12.1,12.2,12.3,12.4**	

Module – 4	**08 Hrs**
What Is Augmented Reality - History of augmented reality, Examples, Related fields, Multimodal displays, Visual perception, Requirements and Characteristics. **The future**- What May Drive Business Cases, An AR Developer's Wish List, Taking AR Outdoors. **Case studies:** Timeline of evolution of AR from VR **TextBook-2: Chapter 1,2,14**	
Module –5	**08 Hrs**
Computer Vision for Augmented Reality - Marker Tracking, Multiple-Camera Infrared Tracking, Natural Feature Tracking by Detection, Simultaneous Localization and Mapping. **Augmented Reality Software -** Introduction, Major Software Components for Augmented Reality Systems, Software used to Create Content for the Augmented Reality Application. **Case studies**: Study all the available AR toolkits. **TextBook-2:Chapter 4**	

Course Outcomes: After completing the course, the students will be able to	
CO1	Illustrate how VR systems work and list the applications of VR.
CO2	Design and implement the components that enables VR systems to be built.
CO3	Apply the system of human vision and its implication on perception and rendering.
CO4	Determine how AR systems works
CO5	Apply the computer vision concepts for AR
CO6	Implementation of AR techniques using of software tools.

Prerequisites:	
Courses	**Nil**
Knowledge on Fundamental Concepts	**Nil**
Knowledge on Connected Tools (If any)	**Nil**

Course Learning Objectives: This course will enable the students to	
CLO1	Learn the fundamental aspects air pollution and modern transportation
CLO2	Gain Knowledge about Internal combustion engine and their operating parameters
CLO3	Understand the configurations of electric vehicle and transmission in electric vehicles
CLO4	Understand the concept of hybrid electric drive trains and architecture of hybrid electric drive trains
CLO5	Gain knowledge about fundamentals of regenerative braking system

Module-1	**08 Hrs**
Environmental Impact and History of Modern Transportation - Air Pollution, Nitrogen Oxides, Carbon Monoxide, Unburned Hydrocarbons, Other Pollutants, Global Warming Petroleum Resources Induced Costs, Importance of Different Transportation, Development Strategies to Future Oil Supply, History of Electric Vehicles, History of Hybrid Electric Vehicles, History of Fuel Cell Vehicles. **Text Book 2: Ch1(Complete)** **Text Book 3: Ch1-1.1-1.1.4,1.2-1.8**	
Module-2	**08 Hrs**
Internal Combustion Engines- 4S, Spark-Ignited IC Engines, Operating Principles, Operation Parameters, Rating Values of Engines, Indicated Work per Cycles and Mean Effective Pressure, Mechanical Efficiency, Fuel/Air and Air/Fuel Ratio, Volumetric Efficiency, Indicated and Brake Power and Torque, Fuel Consumption Characteristics, Spark Timing 4S, Compression-Ignition IC Engines. Simple problems. **Text Book 1: Ch12-12.1,12.2,12.3,12.4, 12.7, Ch13-13.1,13.2,** **Text Book 3: Ch3-3.1-3.1.7,3.2.**	
Module-3	**08 Hrs**
Electric Vehicles- Configurations of Electric Vehicles, Performance of Electric Vehicles, Traction Motor Characteristic, Tractive Effort and Transmission Requirement, Vehicle Performance, Tractive Effort in Normal Driving, Energy Consumption. **Text Book 2: Ch3(Complete)** **Text Book 3: Ch4 (Complete**)	
Module-4	**08 Hrs**
Hybrid Electric Vehicles- Concept of Hybrid Electric Drive Trains, Architectures of Hybrid Electric Drive Trains, Series Hybrid Electric Drive Trains, Parallel Hybrid Electric Drive Trains, Torque-Coupling Parallel Hybrid Electric Drive Trains, Speed-Coupling Parallel Hybrid Electric Drive Trains, Torque-Coupling and Speed-Coupling, Parallel Hybrid Electric Drive Trains	

Text Book 3: Ch5(Complete)	
Module-5	**08 Hrs**
Fundamentals of Regenerative Braking- Energy Consumption in Braking, Braking Power and Energy on Front and Rear Wheels, Brake System of EVs and HEVs, Series Brake — Optimal Feel, Series Brake — Optimal Energy Recovery, Parallel Brake, Antilock Brake System (ABS). **Text Book 3: Ch11(Complete)**	

Course Outcomes: After completing the course, the students will be able to	
CO1	Elaborate the cause of automobile emissions, its effects on environment. Also study History of modern transportation.
CO2	Illustrate different components of 4s SI and CI engines, along with their operating principles and parameters.
CO3	Elucidate about electric vehicles, their configurations, performance and tractive effort.
CO4	Explain about different types of Hybrid engines and their components and hybrid electric drive trains
CO5	Discuss about selection of modern transportation and fundamentals of regenerative braking

Introduction to xG Communication **Stream: EC (Common to all the branches)**						
Course Code	**:**	BETC105F /BETC205F		**Credits**	**:**	3
Hours/Week(L:T:P)	**:**	3:0:0		**CIE**	**:**	50 Marks
Total Hours	**:**	40L		**SEE**	**:**	50 Marks
Course Type	**:**	ETC		**SEE Duration**	**:**	3 Hours

Prerequisites:	
Courses	Wireless Cellular Concepts
Knowledge on Fundamental Concepts	Access Technologies like TDMA, FDMA and CDMA
Knowledge on Connected Tools (If any)	NA

Course Learning Objectives: This course will enable the students to	
1	Provide a comprehensive overview of wireless network infrastructure and the evolution of cellular networks
2	Familiarize themselves with the key concepts and architecture of 2G communication systems.
3	Understand the technological advancements in cellular wireless data networks.
4	Deepen their understanding of 4G LTE technology by examining its core design principles, enabling technologies, and network architecture.
5	Explore the foundational concepts, use cases, and performance requirements of 5G communication systems.

Module – 1	**08 Hrs**
Introduction Overview of existing Network infrastructure, Wireless Network applications, Different generations of wireless cellular networks, 1G (AMPS Characteristics, AMPS Channels, AMPS Layout), 2G,2.5G,3G and 4G Cellular system, IoT: relation to 5G **Text Book 1: Ch 1: 1.3, 1.5, Ch 2: 2.1-2.6** **Text Book 3: Ch 1: 1.1.4**	
Module – 2	**08 Hrs**
2G Communication GSM system overview: Introduction to GSM and TDMA, GSM Network and System Architecture, GSM channel concept(Logical Channels, Broadcast channels, Common Control Channels, Dedicated Control Channels). CDMA Basics : CDMA channel concept **TextBook 1: Ch 5:5.1-5.3, Ch 6:6.3**	
Module – 3	**08 Hrs**
Cellular Wireless Data Networks-2.5G and 3G Systems Introduction to Mobile wireless data Networks, CDPD, GPRS and EDGE Data Networks (Overview of Packet data network, CDPD, GPRS, GPRS networks, GPRS network details, GPRS Network Layout and Operation), CDMA Data Networks, Evolution of GSM and NA-TDMA to 3G, Evolution of CDMA to 3G, SMS, EMS, MMS and MIM Services. **TextBook 1: Ch 7: 7.1-7.6**	
Module – 4	**08 Hrs**
4G Communication LTE: Key Requirements of LTE Design, Key Enabling Technologies and Features of LTE, LTE Network Architecture, The Broadband Wireless Channel: Fading **TextBook 2: Ch 1: 1.3.2, 1.4,1.5, Ch 2: 2.4**	

Module – 5	08 Hrs

5G Communication

Use cases and requirements: Use cases, Requirements and key performance indicators

5G system concept: Concept overview, Extreme mobile broadband, massive machine-type communication, Ultra-reliable machine-type communication, Dynamic radio access network, Lean system control plane, Localized contents and traffic flows, Spectrum toolbox

TextBook 3: Ch 2: 2.1,2.2

Course Outcomes: After completing the course, the students will be able to	
CO1	Demonstrate an understanding of the evolution and infrastructure of wireless cellular networks from 1G to 4G, and the role of IoT in relation to 5G technology.
CO2	Analyze the architecture, channel concepts, and operational characteristics of 2G communication systems, with a focus on GSM and CDMA technologies.
CO3	Examine the structure and operation of cellular wireless data networks, including 2.5G and 3G systems, and their evolution from earlier technologies.
CO4	Evaluate the key design requirements, enabling technologies, and network architecture of 4G LTE systems, focusing on multi-carrier modulation and multi-antenna techniques.
CO5	Explore and assess the use cases, requirements, and key performance indicators of 5G communication systems, including advanced concepts.

Semester: I/II						
Renewable Energy Sources **Stream: ME (Common to all the Branches)**						
Course Code	**:**	**BETC105G/ BETC205G**		**Credits**	**:**	3
Hours/Week (L: T:P)	**:**	3:0:0		**CIE**	**:**	50 Marks
Total Hours	**:**	40 L		**SEE**	**:**	50 Marks
Course Type	**:**	ETC		**SEE Duration**	**:**	3 Hours

Prerequisites:	
Courses	**Nil**
Knowledge on Fundamental Concepts	**Nil**
Knowledge on Connected Tools (If any)	**Nil**

Course Learning Objectives: This course will enable the students to	
CLO1	Understand energy scenario, energy sources and their utilization.
CLO2	Explore society's present needs and future energy demands.
CLO3	Study the principles of renewable energy conversion systems.
CLO4	Exposed to energy conservation methods.

Module – 1	**08 Hrs.**
Introduction: Principles of renewable energy; energy and sustainable development, fundamentals and social implications. worldwide renewable energy availability, renewable energy availability in India, brief descriptions on solar energy, wind energy, tidal energy, wave energy, ocean thermal energy, biomass energy, geothermal energy, oil shale. Introduction to Internet of energy (IOE). **Text Book 1: Ch 1:1.1,1.2,1.3,1.4,1.5** **Text Book 2: Ch 1:1.1,1.2,1.3,1.4**	
Module – 2	**08 Hrs.**
Solar Energy: Fundamentals; Solar Radiation; Estimation of solar radiation on horizontal and inclined surfaces; Solar radiation Measurements- Pyrheliometers, Pyrometer, Sunshine Recorder. **Solar Thermal systems:** Flat plate collector; Solar distillation; Solar Pond electric power plant. **Solar electric power generation**- Principle of Solar cell, Photovoltaic system for electric power generation, advantages, Disadvantages and applications of solar photovoltaic system. **Text Book 1: Ch 2:2.1,2.2,2.3 Ch 3:3.1,3.2,3.3, Ch 5:5.1,5.2,5.3** **Text Book 2: Ch 2:2.1,2.2,2.3 Ch 3:3.1,3.2,3.3, Ch 6:6.1,6.2,6.3**	
Module – 3	**08 Hrs.**
Wind Energy: Properties of wind, availability of wind energy in India, wind velocity and power from wind; major problems associated with wind power, Basic components of wind energy conversion system (WECS); Classification of WECS- Horizontal axis- single, double and multiblade system. Vertical axis- Savonius and darrieus types. **Biomass Energy:** Introduction; Photosynthesis Process; Biofuels; Biomass Resources; Biomass conversion technologies-fixed dome; Urban waste to energy conversion; Biomass gasification (Downdraft)	

Text Book 1: Ch 6:6.1,6.2,6.5,6.7,6.8, Ch 7:7.1,7.2,7.3,7.4	
Module – 4	**08 Hrs.**
Tidal Power: Tides and waves as energy suppliers and their mechanics; fundamental characteristics of tidal power, harnessing tidal energy, advantages and limitations. **Ocean Thermal Energy Conversion:** Principle of working, OTEC power stations in the world, problems associated with OTEC. **Text Book 1: Ch 9:9.1,9.2,9.3,9.4**	
Module – 5	**08 Hrs.**
Green Energy: Introduction, Fuel cells: Classification of fuel cells – H2; Operating principles, Zero energy Concepts. Benefits of hydrogen energy, hydrogen production technologies (electrolysis method only), hydrogen energy storage, applications of hydrogen energy, problem associated with hydrogen energy. **Text Book 1: Ch 11:11.1,11.2,11.3,11.4,11.5,11.6**	

Course Outcomes: After completing the course, the students will be able to	
CO1	Describe the environmental aspects of renewable energy resources. In Comparison with various conventional energy systems, their prospects and limitations.
CO2	Describe the use of solar energy and the various components used in the energy production with respect to applications like-heating, cooling, desalination, power generation.
CO3	Elucidate the conversion principles of wind, tidal energy, ocean thermal energy conversion and hydrogen energy.
CO4	Describe the concept of biomass energy resources and green energy

Text Books	
1	Non-conventional Energy sources, G D Rai, Khanna Publication, Fourth Edition, 2002
2	Energy Technology, S.Rao and Dr. B.B. Parulekar, Khanna Publication, Solar energy, Subhas P Sukhatme, Tata McGrawHill, 2nd Edition, 1996.

Reference Books

Semester: I/II						
WASTE MANAGEMENT **Stream: CV (Common to all the branches)**						
Course Code	**:**	BETC105H/ BETC205H		**Credits**	**:**	3
Hours/Week(L:T:P)	**:**	3:0:0		**CIE**	**:**	50 Marks
Total Hours	**:**	40L		**SEE**	**:**	50 Marks
Course Type	**:**	ETC		**SEE Duration**	**:**	3 Hours

Prerequisites	
Courses	Basic Science, Environmental Studies
Knowledge on Fundamental Concepts	Types of waste, Waste Hierarchy, Waste Management Strategies
Knowledge on Connected Tools (If any)	**-**

Course Learning Objectives: This course will enable the students to	
CLO1	Learn the principles and processes involved in the collection, transportation, and disposal of solid waste.
CLO2	Explore various solid waste treatment technologies, including composting, incineration, and landfilling, and evaluate their environmental impacts.
CLO3	Develop skills in waste minimization, recycling, and resource recovery to promote sustainable solid waste management practices.
CLO4	Learn the treatment and disposal methods for biomedical waste, including incineration, autoclaving, and chemical disinfection, while focusing on risk management and environmental protection.
CLO5	Explore e-waste recycling and recovery technologies, and develop strategies for reducing e-waste generation through sustainable design, reuse, and refurbishment practices.

Module – 1	**08 Hrs**
INTRODUCTION TO SOLID WASTE MANAGEMENT: Definition and types of waste: Municipal, Industrial, Hazardous, and Special wastes. Importance and objectives of waste management. Overview of global and local waste management challenges. **WASTE GENERATION AND CHARACTERIZATION:** Sources and Types of waste. Waste Composition Analysis. Factors affecting Waste Generation. Methods for Waste Quantification and Characterization. **Self-Learning:** Technological Innovations in Waste Characterization: such as spectrometry, Machine learning, and AI. **Text Book 1: Ch10: 10.1-10.8 ,Ch11: 11.1-11.4**	
Module – 2	**08 Hrs**
SOLID WASTE MANAGEMENT: **Collection, Transportation, and Storage:** Waste collection methods, Door-to-Door, Community bins, etc. Transportation Logistics and Routing. Temporary Storage methods and Facilities.	

Hauled Container System, Stationary Container System. Transfer Station - Factors affecting Transfer station.

Waste Processing Technologies: Mechanical Processing: Shredding, Sorting, and Compaction. Biological Treatment: Composting, Anaerobic Digestion. Thermal treatment: Incineration, Pyrolysis, and Gasification.

Self-Learning: Challenges and opportunities of implementing advanced waste processing technologies in developing countries.

Text Book 1:Ch11: 11.5 -11.17,Ch12 : 12.1-12.4 ,12.8-12.14

Module – 3	**08 Hrs**

Recycling and Resource Recovery: Recycling processes for Paper, Plastics, Glass, and Metals. Resource recovery from waste. Waste-to-Energy Technologies. Recycle and reuse of Construction and Demolition waste

FINAL DISPOSAL TECHNIQUES:

Landfill classification, Types and Methods, landfill-siting consideration, characteristics, collection and use of landfill gas; composition, collection and treatment of leachate, Landfill design - an Overview. Operation and Post-closure care.

Self-Learning: Strategies for mitigating the negative impacts of landfills on local environments and populations.

Text Book 1:Ch 12 : 12.5-12.7,12.10 -12.17,Ch 11: 11.18 -11.21

Module – 4	**08 Hrs**

INTRODUCTION TO BIOMEDICAL WASTE: Sources and classification of Biomedical waste. Hazards associated with biomedical waste. Legal and regulatory framework for biomedical waste management.

Handling, Segregation, and Storage: Guidelines for waste segregation at source. Color coding and storage of biomedical waste. Transportation and handling of biomedical waste.

Treatment and Disposal Methods: Thermal treatment: Incineration and autoclaving. Chemical treatment and disinfection. Disposal methods: Landfilling, deep burial, and other specialized methods.

Self-Learning: Emerging and alternative technologies for the treatment of biomedical waste, such as microwave treatment, plasma pyrolysis, and enzymatic treatment.

Text Book 2 :Ch 1: 1.1-1.2,Ch 2: 2.1-2.4,Ch 3: 3.1-3.6,

Module – 5	**08 Hrs**

INTRODUCTION TO E-WASTE: Definition and types of e-waste. Sources of e-waste: Household, commercial, industrial. Environmental and health impacts of e-waste.

Sustainable E-Waste Management: Strategies for reducing e-waste generation. Reuse and refurbishment of electronic products. Circular economy principles in e-waste management.

Policy, Legislation, and Community Involvement: Role of policy and legislation in waste management. Community participation and awareness programs. Waste management in developing countries. **Self-Learning:** Explore the health and environmental risks faced by workers in informal e-waste recycling. **Text Book 3: Ch 1:1.1-1.3,Ch 4: 4.1- 4.4,Ch 5: 5.1- 5.4**

Course Outcomes: After completing the course, the students will be able to	
CO1	Design and implement effective collection, transportation, and disposal systems for solid waste, considering environmental, economic, and social factors.
CO2	Evaluate and select appropriate solid waste treatment technologies, such as composting, incineration, and landfilling, based on waste characteristics and regulatory requirements.
CO3	Develop and apply strategies for waste reduction, recycling, and resource recovery, contributing to sustainable solid waste management practices.
CO4	Design and implement biomedical waste treatment and disposal systems, such as incineration, autoclaving, and chemical disinfection, with a focus on minimizing environmental impact and ensuring compliance with legal standards.
CO5	Assess and implement e-waste recycling and recovery technologies, promoting sustainable practices such as reuse, refurbishment, and reduction of e-waste generation.

SUSTAINABLE ENGINEERING **Stream: CV (Common to all the Branches)**						
Course Code	**:**	BETC105I/BETC205I		**Credits**	**:**	3
Hours/Week(L:T:P)	**:**	3:0:0		**CIE**	**:**	50Marks
Total Hours	**:**	40		**SEE**	**:**	50Marks
Course Type	**:**	ETC		**SEE Duration**	**:**	3 Hours

Prerequisites:	
Courses	**Basic Sciences, Environmental Science**
Knowledge on Fundamental Concepts	Sustainability Principles, **Climate Change Mitigation and Adaptation**
Knowledge on Connected Tools (If any)	NA

Course Learning Objectives: This course will enable the students to	
CLO1	Learn about the principles, indicators and general concept of sustainability.
CLO2	Apply the fundamentals of energy sources, energy use, energy efficiency, and resulting environmental implications of various energy supplies.
CLO3	Apply the sustainability concepts in engineering applications
CLO4	Analyze the principles and frame work of sustainable engineering
CLO5	Apply Life Cycle Assessment tool in sustainable engineering

Module – 1	**08Hrs**
The climate understanding: Preamble- The epic history of Earth- The great climate system- The collapse of Biodiversity- The overexploitation of Resources- Impact on human Societies **The climate Course Act:** Building Roadmap to Action- Acting on the carbon footprint- Acting on the ecological footprint- The low carbon transition- Acting on your own footprint (IT, Finance, legal, HR, Marketing and Communications) **Text Book 2: Ch 2: 2.1- 2.2**	
Module – 2	**08Hrs**
Basics of sustainability: Environmental Awareness- Definition and Key terms-Climate change and Climate systems- Effect of climate change and Managing climate change- Action guide for environmentally conscious lifestyle, what is GHG reporting- What is EPD & LCA (building a product) **Circular Economy:** Understanding the circular economy- Designing for a circular economy and making the shift **Use of renewable Energy:** Energy efficiency- Energy Storage- Wind, Solar, Geothermal, Hydro, Biomass, Hydrogen and Heat pumps **Text Book 1: Ch 2: 2.1-2.2**	
Module – 3	**08 Hrs**
Sustainable Materials: Design for sustainability- Sustainable Packaging-Transparency, LCA & EPD with case studies- Green building and Certifications- Sustainable supply chain **Decarbonization:** Climate change and greenhouse gases -Monitoring, measuring and reducing carbon emissions- Carbon management measures, carbon foot printing, carbon trading &carbon offsetting- Developing and managing carbon accounting systems	

Text Book 1: Ch 2: 2.1-2.2 , Ch 4: 4.2-4.4 **Text Book 2: Ch 16: 16.1- 16.6**
Module – 4 **08 Hrs**
Emission Reduction: GHG accounting and reporting principles- Business goals and inventory design- Reporting GHG emissions- Setting Organizational boundaries- Setting Operational Boundaries- Tracking emissions over a time - Identifying and calculating GHG emissions with example **Environmental Audits:** ISO 9001 and ISO 14001 **Natural Resource conservation:** Lower water and energy consumption. **Text Book 1: Ch 3: 3.2-3.3** **Text Book 3: Ch 3: 3.3-3.5**
Module – 5 **08 Hrs**
Environmental Life Cycle Costing, Social Life Cycle Assessment, and Life Cycle Sustainability Assessment: Introduction, Environmental Life Cycle Costing, Social Life Cycle Assessment, Life Cycle Sustainability, LCA Applications in Engineering: Environmental Product Declarations and Product Category Rules, Buildings and the Built Environment, Chemical and Chemical Production Food and Agriculture. **Integrating Sustainability in Engineering Design:** Problems Solving in Engineering, conventional to Sustainable Engineering Design Process, Design for Life Guidelines and Strategies, Measuring Sustainability, Sustainable Design through sustainable procurement criteria, Case studies on sustainable Engineering Design Process – Sustainable Process in Design, Production and product design in Engineering fields. **Text Book 1: Ch 3: 3.2- 3.3, Ch 4: 4.3-4.4** **Text Book 2: Ch 17:17.1-17.5**

Course Outcomes: After completing the course, the students will be able to	
CO1	Expose the concepts related to the study of sustainability, climate change, and ecological footprint
CO2	Application of Sustainable Engineering Concepts and Principles in Engineering
CO3	Elucidate the basics of sustainable development, sustainable engineering and its role in engineering
CO4	Problem solving by proposing creative, balanced solutions to sustainability challenges
CO5	Apply the Principle and methodology of Life Cycle Assessment Tool to engineering systems and integration methods of sustainability to Engineering Design.

CO5	3	3	3	2	2	2	3	2				2

Semester: I/II						
Introduction to Python Programming (Common to All the Streams)						
Course Code	**:**	BPLC105/ BPLC205		**Credits**	**:**	3
Hours/Week (L:T:P)	**:**	2:0:2		**CIE**	**:**	50 Marks
Total Hours	**:**	40L+12P		**SEE**	**:**	50 Marks
Course Type	**:**	PLC(IC)		**SEE Duration**	**:**	3 Hours

Prerequisites:	
Courses	Basic computer skills, Algebra or mathematics, Problem-solving skills
Knowledge on Fundamental Concepts	Basic math concepts, Programming fundamentals
Knowledge on Connected Tools (If any)	Text Editors, Integrated Development Environments (IDEs)

Course Objectives:	
CLO1	Learn the syntax and semantics of the Python programming language.
CLO2	Illustrate the process of structuring the data using lists, tuples
CLO3	Demonstrate the use of built-in functions to navigate the file system.
CLO4	Implement the Object-Oriented Programming concepts in Python.
CLO5	Demonstrate the use of method concepts in Python.

Module-I	**08 Hrs**
Python Basics: Entering Expressions into the Interactive Shell, The Integer, Floating-Point, and String Data Types, String Concatenation and Replication, Storing Values in Variables, Your First Program, Dissecting Your Program, Flow control: Boolean Values, Comparison Operators, Boolean Operators, Mixing Boolean and Comparison Operators, Elements of Flow Control, Program Execution, Flow Control Statements, Importing Modules, Ending a Program Early with sys.exit(), **Text Book 1:** Ch 1, 2	
Module – II	**08 Hrs**
Functions: def Statements with Parameters, Return Values and return Statements,The None Value, Keyword Arguments and print(), Local and Global Scope, The global Statement, Exception Handling. Lists: The List Data Type, Working with Lists, Augmented Assignment Operators, Methods, List, List-like Types: Strings and Tuples, Example of Tuples, References, Dictionaries and Structuring Data: The Dictionary Data Type, Pretty Printing. **Text Book 1:** Ch 4, 5	
Module –III	**08 Hrs**

Manipulating Strings: Working with Strings, Useful String Methods, Project: Password Locker, Project: Adding Bullets to Wiki Markup Reading and Writing Files: Files and File Paths, The
os.path Module, The File Reading/Writing Process, Saving Variables with the shelve Module, Saving Variables with the print.format() Function, Project: Generating Random Quiz Files, Project:
Multiclip board

Text Book 1: Ch 6, 9

Module –IV	**08 Hrs**

Classes and objects: Programmer-defined types, Attributes, Rectangles, Instances as return values, Objects are mutable, Copying, Classes and functions: Time, Pure functions, Modifiers, Prototyping versus planning,

Classes and methods: Object-oriented features, Printing objects, Another example, A more complicated example, The init method, The __str__ method, Operator overloading, Type-based dispatch, Polymorphism, Interface and implementation

Text Book 2: Ch 15:15.1-15.6, Ch 16:16.1-16.4, Ch 17:17.1-17.9, 17.11

Module –V	**08 Hrs**

The NumPy Library: Ndarray: the heart of the library, Basic operations, indexing, slicing and iterating, conditions and boolean arrays, array manipulation, general concepts, reading and writing array data on files. The pandas Library: an introduction to Data structure, other functionalities on indexes, operations between data structures, function application and mapping.
Data Visualization with matplotlib -- The matplotlib Library – Installation, IPython and IPython QtConsole
Matplotlib Architecture -- Backend Layer, Artist Layer, Scripting Layer (pyplot) -- pylab and pyplot
-- pyplot , A Simple Interactive Chart -- Set the Properties of the Plot, matplotlib and NumPy, Working with Multiple Figures and Axes, Adding Further Elements to the Chart -- Adding Text -- Adding a Grid -- Adding a Legend ,Saving Your Charts

Text Book 3: Ch 3, Ch 4 and Ch 7

Course Outcomes: After completing the course, the students will be able to	
CO1	Demonstrate proficiency in handling loops and creation of looping functions.
CO2	Identify the methods to create and manipulate lists, tuples and dictionaries.
CO3	Develop programs for string processing and file organization
CO4	Interpret the concepts of Object-Oriented Programming as used in Python.
CO5	Use the NumPy, Pandas and Matplotlib constructs for matrix manipulations and data analytics.

CO – PO MAPPING

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12
CO1	2	3	2						1			
CO2	2	2	3		1							1
CO3	3	2	2						1			
CO4	2	2	2									
CO5	2	2	2						1		1	
CO6	2	2	2			1				1		1

Programming Exercises:

1. a. Develop a program to read the student details like Name, USN, and Marks in three subjects. Display the student details, total marks and percentage with suitable messages.

   b. Develop a program to read the name and year of birth of a person. Display whether the person is a senior citizen or not.

2. a. Develop a program to generate Fibonacci sequence of length (N). Read N from the console.

   b. Write a function to calculate factorial of a number. Develop a program to compute binomial coefficient (Given N and R).

3. Read N numbers from the console and create a list. Develop a program to print mean, variance and standard deviation with suitable messages.

4. Read a multi-digit number (as chars) from the console. Develop a program to print the frequency of each digit with suitable message.

5. Develop a program to print 10 most frequently appearing words in a text file. [Hint: Use dictionary with distinct words and their frequency of occurrences. Sort the dictionary in the reverse order of frequency and display dictionary slice of first 10 items]

6. Develop a program to sort the contents of a text file and write the sorted contents into a separate text file. [Hint: Use string methods strip(), len(), list methods sort(), append(), and file methods open(), readlines(), and write()].

7. Develop a program that uses class Student which prompts the user to enter marks in three subjects and calculates total marks, percentage and displays the score card details. [Hint: Use list to store the marks in three subjects and total marks. Use __init__() method to initialize name, USN and the lists to store marks and total, Use getMarks() method to read marks into the list, and display() method to display the score card details.]

8. a. Write a Python program to Demonstrate how to Draw a Bar Plot using Matplotlib.
b. Write a Python program to Demonstrate how to Draw a Scatter Plot using Matplotlib.

9. a. Write a Python program to Demonstrate how to Draw a Histogram Plot using Matplotlib.

b. Write a Python program to Demonstrate how to Draw a Pie Chart using Matplotlib.

10. a. Write a Python program to illustrate Linear Plotting using Matplotlib.
b. Write a Python program to illustrate liner plotting with line formatting using Matplotlib.

Additional Problems to Solve

1. Given an integer, n, perform the following conditional
   actions: If n is odd, print Weird
   If n is even and in the inclusive range of 2 to 5, print
   Not Weird If n is even and in the inclusive range of 6
   to 20 print Weird
   If n is even and greater than 20, print Not Weird

2. Given the participants' score sheet for your University Sports Day, you are required to find the runner-up score. You are given scores. Store them in a list and find the score of the runner-up.
3. Given the names and grades for each student in a class of students, store them in a nested list and print the name(s) of any student(s) having the second lowest grade.

   Note: If there are multiple students with the second lowest grade, order their names alphabetically and print each name on a new line.

4. Read in a dictionary containing key/value pairs of name:[marks] for a list of students. Print the average of the marks array for the student name provided, showing 2 places after the decimal.
5. Given a string. Split the string on a " " (space) delimiter and join using a – hyphen.
6. Given an integer, n , print the following values for each integer i from 1 to n:

a) Decimal
b) Octal
c) Hexadecimal (capitalized)
d) Binary

7. Given two complex numbers, and you have to print the result of their addition, subtraction, multiplication, division and modulus operations using class concept. The real and imaginary precision part should be correct up to two decimal places.

Semester: I/II						
Communicative English **(Common to all the branches)**						
Course Code	**:**	**BENG106 / BENG206**		**Credits**	**:**	1
Hours/Week(L:T:P)	**:**	1:0:0		**CIE**	**:**	50 Marks
Total Hours	**:**	15		**SEE**	**:**	50 Marks
Course Type	**:**	AEC		**SEE Duration**	**:**	1 Hour

Prerequisites:	
Courses	**English**
Knowledge on Fundamental Concepts	**Parts of Speech, Communication Skills**
Knowledge on Connected Tools (If any)	**NA**

Course Learning Objectives: This course will enable the students to	
CLO1	To know about Fundamentals of Communicative English and Communication Skills in general.
CLO2	To train to identify the nuances of phonetics, intonation and enhance pronunciation skills for better Communication skills.
CLO3	To impart basic English grammar and essentials of important language skills.
CLO4	To enhance English vocabulary and language proficiency for better communication skills.
CLO5	To learn about Techniques of Information Transfer through presentation

Module – 1	**3 Hrs**
Introduction to Communicative English: Communicative English, Fundamentals of Communicative English, Process of Communication, Barriers to Effective Communicative English, Different styles and levels in Communicative English. Interpersonal and Intrapersonal Communication Skills. Life History of Ratan N Tata by Dr. Thomas Mathew. **Text Book 1: Ch 1: 1.4 ,1.12, 1.11.3-4, 1.13**	
Module – 2	**3 Hrs**
Introduction to Phonetics : Phonetic Transcription, English Pronunciation, Pronunciation Guidelines to consonants andvowels, Sounds Mispronounced, Silent and Non silent Letters, Syllables and Structure. Word Accent, Stress Shift and Intonation, Spelling Rules and Words often Misspelt. Common Errors in Pronunciation. **Text Book 1: Ch 7: 7.1 to 7.63** **Text Book 2: Ch 2: 2.1 to 2.13**	
Module-3	**3 Hrs**
Basic English Communicative Grammar and Vocabulary PART – I: Grammar: Basic English Grammar and Parts of Speech, Articles and Preposition. Question Tags, One Word Substitutes, Strong and Weak forms of words, Introduction to Vocabulary, All Types of Vocabulary – Exercises on it. **Text Book 1: Ch 2: 2.1, 2.2, 2.2.1 to 2.2.6** **Text Book 2: Ch 3: 3.1- 3.5** **Text Book 3: Ch 4: 4.14, Ch :43**	
Module-4	**3 Hrs**
Basic English Communicative Grammar and Vocabulary PART – II: Words formation – Prefixes and Suffixes, Contractions and Abbreviations.	

Word Pairs (Minimal Pairs) – Exercises, Tense and Types of tenses, The Sequence of Tenses (Rules in use of Tenses) and Exercises on it. **Text Book 2: Ch 4: 4.3-4.4**
Module-5 **3Hrs**
Communication Skills for Employment: Information Transfer: Oral Presentation and its Practice. Difference between Extempore/Public Speaking, Communication Guidelines. Mother Tongue Influence (MTI), Various Techniques for Neutralization of Mother Tongue Influence. Reading and Listening Comprehensions – Exercises. **Text Book 2: Ch 5: 5.1-5.4**

Course Outcomes: After completing the course, the students will be able to	
CO1	Apply the fundamentals of communication skills in their conversation.
CO2	Identify the nuances of phonetics, intonation and enhance pronunciation skills.
CO3	Impart basic English grammar and essentials of language skills as per present requirement.
CO4	Recognize and habit all types of English vocabulary and language proficiency.
CO5	Adopt the techniques of Information Transfer through presentation.
CO6	Prepare brief report on achievements of Ratan Tata.

Text Books

Semester: I/II						
Professional Writing Skills in English (Common to all the branches)						
Course Code	**:**	BPWS106 / BPWS206		**Credits**	**:**	1
Hours/Week(L:T:P)	**:**	1:0:0		**CIE**	**:**	50 Marks
Total Hours	**:**	15		**SEE**	**:**	50 Marks
Course Type	**:**	AEC		**SEE Duration**	**:**	1 Hour

Prerequisites:	
Courses	**English**
Knowledge on Fundamental Concepts	**Technical English Skills**
Knowledge on Connected Tools (If any)	**NA**

Course Learning Objectives: This course will enable the students to	
CLO1	Identify the Common Errors in Writing and Speaking of English.
CLO2	Achieve better Technical writing and Presentation skills for employment.
CLO3	Read Technical proposals properly and make them to Write good technical reports.
CLO4	Acquire Employment and Workplace communication skills.
CLO5	Learn about Techniques of Information Transfer through presentation in different level.

Module – 1	**3 Hrs**
Identifying Common Errors in Writing and Speaking English: Common errors identification in parts of speech, Use of verbs and phrasal verbs, Auxiliary verbs and their forms, Subject Verb Agreement (Concord Rules), Common errors in Subject-verb agreement, Sequence of Tenses and errors identification in Tenses. Words Confused/Misused. Inspiring stories of Sudha Murthy by Prachi Kiran **Text Book 1: Ch: 1.1 – 1.10**	
Module – 2	**3 Hrs**
Nature and Style of sensible writing: Organizing Principles of Paragraphs in Documents, Writing Introduction and Conclusion, Importance of Proper Punctuation, Precise writing and Techniques in Essay writing, Sentence arrangements and Corrections activities. Misplaced modifiers, Contractions, Collocations, Word Order, Errors due to the Confusion of words. **Text Book 1: Ch: 2.1 – 2.12**	
Module-3	**3 Hrs**
Technical Reading and Writing Practices: Technical writing process, Introduction to Technical Reports writing, Significance of Reports, Types of Reports. Introduction to Technical Proposals Writing, Types of Technical Proposals, Characteristics of Technical Proposals. Scientific Writing Process. Grammar – Voices and Reported Speech, Spotting Error & Sentence Improvement, Cloze Test and Theme Detection Exercises. **Text Book 1: Ch: 3.1 – 3.14**	
Module-4	**3 Hrs**
Professional Communication for Employment: Listening Comprehension, Types of Listening, Listening Barriers, Improving Listening Skills. Reading Comprehension, Tips for effective reading. Job Applications, Types of official/employment/business Letters, Resume vs. Bio Data, Profile, CV. Writing effective resume for employment, Emails, Blog Writing and Memos. **Text Book 1: Ch: 4.1 – 4.15**	
Module-5	**3Hrs**

Professional Communication at Workplace: Group Discussion and Professional Interviews, Characteristics and Strategies of a GD and PI's, Intra and Interpersonal Communication Skills at workplace, Non-Verbal Communication Skills and its importance in GD and Interview. Presentation skills and Formal Presentations by Students, Strategies of Presentation Skills. **Text Book 1: Ch: 5.1 – 5.9**

Course Outcomes: After completing the course, the students will be able to	
CO1	Understand and identify the common errors in writing and speaking.
CO2	Achieve better technical writing and presentation skills.
CO3	Read and write technical proposals and reports.
CO4	Acquire employment and workplace communication skills.
CO5	Learn about techniques of information transfer through the presentation at different levels.
CO6	Prepare brief report on inspiring stories written by Sudha Murthy.

Indian Constitution (Common to all the branches)						
Course Code	**:**	BICO107/ BICO207		**Credits**	**:**	1
Hours/Week(L:T:P)	**:**	1:0:0		**CIE**	**:**	50 Marks
Total Hours	**:**	15 L		**SEE**	**:**	50 Marks
Course Type	**:**	HSSMC		**SEE Duration**	**:**	1 Hours

Prerequisites:	
Courses	Social Science
Knowledge on Fundamental Concepts	Constitution, History
Knowledge on Connected Tools (If any)	NA

Course Learning Objectives: This course will enable the students to	
CLO1	Know about the basic structure of Indian Constitution
CLO2	Know the Fundamental Rights (FR's), DPSP's and Fundamental Duties (FD's) of our constitution
CLO3	Know about our Union Government, political structure & codes, procedures.
CLO4	Know the State Executive & Elections system of India.
CLO5	Learn the Amendments and Emergency Provisions, other important provisions given by the constitution

Module – 1	**08 Hrs**
Indian Constitution: Necessity of the Constitution, Societies before and after the Constitution adoption. Introduction to the Indian constitution, Making of the Constitution, Role of the Constituent Assembly. **Text Book 1: Ch 1: 1.1 – 1.3,** **Text Book 2: Ch: 2.1 – 2.4**	
Module – 2	**08 Hrs**
Salient features of India Constitution. Preamble of Indian Constitution & Key concepts of the Preamble. Fundamental Rights (FR's) and its Restriction and limitations in different Complex Situations building. **Text Book 2: Ch: 3**	
Module – 3	**08 Hrs**
Directive Principles of State Policy (DPSP's) and its present relevance in Indian society. Fundamental Duties and its Scope and significance in Nation, Union Executive : Parliamentary System, Union Executive – President, Prime Minister, Union Cabinet. **Text Book 1: Ch: 4.1 – 4.12** **Text Book 2: Ch: 11**	
Module – 4	**08 Hrs**
Parliament - LS and RS, Parliamentary Committees, Important Parliamentary Terminologies. Judicial System of India, Supreme Court of India and other Courts, Judicial Reviews and Judicial Activism. **Text Book 2: Ch: 12**	
Module – 5	**08 Hrs**
State Executive and Governer, CM, State Cabinet, Legislature - VS & VP, Election Commission, Elections & Electoral Process. Amendment to Constitution, and Important Constitutional Amendments till today. Emergency Provisions **Text Book 2: Ch: 13**	

Course Outcomes: After completing the course, the students will be able to	
CO1	Analyze the basic structure of Indian Constitution.

CO2	Remember their Fundamental Rights, DPSP's and Fundamental Duties (FD's) of our constitution.
CO3	Know about our Union Government, political structure & codes, procedures.
CO4	Understand our State Executive & Elections system of India.
CO5	Remember the Amendments and Emergency Provisions, other important provisions given by the constitution.

Semester: I/II						
Scientific Foundations of Health **(Common to all the branches)**						
Course Code	**:**	BSFH108 / BSFH208		**Credits**	**:**	1
Hours/Week(L:T:P)	**:**	1:0:0		**CIE**	**:**	50 Marks
Total Hours	**:**	15		**SEE**	**:**	50 Marks
Course Type	**:**	HSSMC		**SEE Duration**	**:**	1 Hour

Prerequisites:	
Courses	Biology, Chemistry
Knowledge on Fundamental Concepts	Psychology, Health Sciences
Knowledge on Connected Tools (If any)	**NA**

Course Learning Objectives: This course will enable the students to	
CLO1	Know about Health and wellness (and its Beliefs) & It's balance for positive mindset.
CLO2	Build the healthy lifestyles for good health for their better future.
CLO3	Create a Healthy and caring relationships to meet the requirements of good/social/positive life.
CLO4	learn about Avoiding risks and harmful habits in their campus and outside the campus for their bright future
CLO5	Prevent and fight against harmful diseases for good health through positive mindset

Module – 1	**3 Hrs**
Good Health & It's balance for positive mindset: Health -Importance of Health, Influencing factors of Health, Health beliefs, Advantages of good health, Health & Behavior, Health & Society, Health & family, Health & Personality, Psychological disorders-Methods to improve good psychological health, Changing health habits for good health. **Text Book 1: Ch 1** **Text Book 2: Ch 2**	
Module – 2	**3 Hrs**
Building of healthy lifestyles for better future: Developing healthy diet for good health, Food & health, Nutritional guidelines for good health, Obesity & overweight disorders and its management, Eating disorders, Fitness components for health, Wellness and physical function, How to avoid exercise injuries **Text Book 1: Ch 2** **Text Book 2: Ch 6**	
Module-3	**3 Hrs**
Creation of Healthy and caring relationships: Building communication skills, Friends and friendship - Education, the value of relationship and communication skills, Relationships for Better or worsening of life, understanding of basic instincts of life (more than a biology), Changing health behaviours through social engineering. **Text Book 1: Ch 3** **Text Book 2: Ch 7**	
Module-4	**3 Hrs**

Avoiding risks and harmful habits: Characteristics of health compromising behaviors, Recognizing and avoiding of addictions, How addiction develops, Types of addictions, influencing factors of addictions, Differences between addictive people and non-addictive people & their behaviors. Effects of addictions Such as…, how to recovery from addictions **Text Book 1: Ch 4** **Text Book 2: Ch 5**

Module-5	**3Hrs**
Preventing & fighting against diseases for good health: How to protect from different types of infections, How to reduce risks for good health, Reducing risks & coping with chronic conditions, Management of chronic illness for Quality of life, Health & Wellness of youth :a challenge for upcoming future, Measuring of health & wealth status. **Text Book 1: Ch 5** **Text Book 2: Ch 10**	

Course Outcomes: After completing the course, the students will be able to	
CO1	Understand and analyze about Health and wellness (and its Beliefs) & It's balance for positive mindset.
CO2	Develop the healthy lifestyles for good health for their better future.
CO3	Build a Healthy and caring relationships to meet the requirements of good/social/positive life.
CO4	To learn about Avoiding risks and harmful habits in their campus and outside the campus for their bright future.
CO5	Prevent and fight against harmful diseases for good health through positive mindset.

CO5						2	2	1				3

Semester:I / II						
SAAMSKRUTHIKA KANNADA (Common to all the branches)						
Course Code	:	**BSKA107 / BSKA207**		**Credits**	:	1
Hours/Week(L:T:P)	:	**1:0:0**		**CIE**	:	50Marks
TotalHours	:	**15 Hours**		**SEE**	:	50Marks
Course Type	:	**HSSMC**		**SEEDuration**	:	1 Hours

Prerequisites:	
Courses	**KANNADA**
Knowledge on Fundamental Concepts	**To understand the language, cultural nuances, rituals and celebrations that makes Karnataka unique.**
Knowledge on Connected Tools (If any)	**Not applicable.**

CourseLearning Objectives: This course will enable the students to	
CLO1	ವೃತಿಪರ ಪದವಿ ವಿದ್ಯಾರ್ಥಿಗಳಾಗಿರುವುದರಿಂದ ಕನ್ನಡ ಭಾಷೆ ,ಸಾಹಿತ್ಯ ಮತ್ತು ಕನ್ನಡದ ಸಂಸ್ಕೃತಿಯ ಪರಿಚಯ ಮಾಡಿಕೊಡುವುದು.
CLO2	ಕನ್ನಡ ಸಾಹಿತ್ಯದ ಪ್ರಧಾನ ಭಾಗವಾದ ಆಧುನಿಕ ಪೂರ್ವ ಮತ್ತು ಆಧುನಿಕ ಕಾವ್ಯಗಳನ್ನುಸಾಂಕೇತಿಕವಾಗಿ ಪರಿಚಯಿಸುವುದು.
CLO3	ವಿದ್ಯಾರ್ಥಿಗಳಲ್ಲಿ ಸಾಹಿತ್ಯಮತ್ತು ಸಂಸ್ಕೃತಿಯ ಬಗ್ಗೆ ಅರಿವು ಹಾಗೂ ಆಸಕ್ತಿ ಮೂಡಿಸುವುದು.
CLO4	ತಾಂತ್ರಿಕ ವ್ಯಕ್ತಿಗಳ ಪರಿಚಯವನ್ನು ಹಾಗೂ ಅವರು ಸಾಧಿಸಿದ ವಿಷಯಗಳನ್ನು ಪರಿಚಯಿಸುವುದು.
CLO5	ಸಾಂಸ್ಕೃತಿಕ, ಜನಪದ ಹಾಗೂ ಪ್ರವಾಸ ಕಥನಗಳ ಪರಿಚಯ ಮಾಡಿಕೊಡುವುದು.

ಘಟಕ – 1	**03Hrs**
ಕನ್ನಡ ಸಂಸ್ಕೃತಿ ಮತ್ತು ಭಾಷೆ ಕುರಿತಾದ ಲೇಖನಗಳು – **1. ಕರ್ನಾಟಕದ ಸಂಕ್ಷಿಪ್ತ ಇತಿಹಾಸ ಮತ್ತು ಸಾಹಿತ್ಯದ ಬೆಳೆವಣಿಗೆ – ಹಂಪನಾಗರಾಜಯ್ಯ** **2. ಕರ್ನಾಟಕದ ಏಕೀಕರಣ :ಒಂದು ಅಪೂರ್ವಚರಿತ್ರೆ - ಜಿ . ವೆಂಕಟಸುಬ್ಬಯ್ಯ** **3. ಆಡಳಿತ ಭಾಷೆಯಾಗಿ ಕನ್ನಡ - ಡಾ .ಎಲ್ .ತಿಮ್ಮೇಶ ಮತ್ತು ಪ್ರೋ. ವಿ .ಕೇಶವಮೂರ್ತಿ** **ಪಠ್ಯಪುಸ್ತಕ:** - ಘಟಕ 1: 1.1 : 12 – 15, 1.2:23-25, 1.3:28-30	
ಘಟಕ – 2	**03Hrs**
ಆಧುನಿಕ ಪೂರ್ವದ ಕಾವ್ಯಭಾಗ - **1. ವಚನಗಳು :ಬಸವಣ್ಣ , ಅಕ್ಕಮಹಾದೇವಿ , ಅಲ್ಲಮಪ್ರಭು ,ಜೇಡರದಾಸಿಮಯ್ಯ ,ಆಯ್ದಕ್ಕಿಮಾರಯ್ಯ,ಆಯ್ದಕ್ಕಿಲಕ್ಕಮ್ಮ.** **2. ಕೀರ್ತನೆಗಳು :ತಲ್ಲಣಿಸದಿರುಕಂಡ್ಯತಾಳುಮನವೇ – ಕನಕದಾಸರು** **3. ತತ್ವಪದಗಳು :ಸಾವಿರಕೊಡಗಳಸುಟ್ಟು- ಶಿಶುನಾಳಶರೀಫ** **4. ಜನಪದಗೀತೆ :ಯಾಕೆಬಡಿದಾಡ್ತಿತಮ್ಮ –ಎಂ.ಎಸ್. ರವಿಗೌಡ** **5.** **ಪಠ್ಯಪುಸ್ತಕ :- ಘಟಕ 2: 2.1:34-35 2.2:40-42 2.3: 44 2.4: web link 4**	
ಘಟಕ - 3	**03Hrs**

ಆಧುನಿಕ ಕಾವ್ಯಭಾಗ- **1. ಡಿವಿಜಿ ರವರ ಮಂಕುತಿಮ್ಮನ ಕಗ್ಗದಿಂದ ಆಯ್ದ ಕೆಲವುಭಾಗ** **2. "ಒಳಿತು ಮಾಡು ಮನುಸ" -ಋಷಿ.** **3.ಹೊಸ ಬಾಳಿನ ಗೀತೆ–ಕುವೆಂಪು** **ಪಠ್ಯಪುಸ್ತಕ :- ಘಟಕ 3: 3.1:52-53 3.2: web link 3 3.3: 55-56**
ಘಟಕ - 4 **0Hrs**
ತಾಂತ್ರಿಕ ವ್ಯಕ್ತಿಗಳ ಪರಿಚಯಮತ್ತುಪ್ರಚಲಿತವಿದ್ಯಾಮಾನಗಳು - **1.ಡಾ .ಸರ್ .ಎಂ .ವಿಶ್ವೇಶ್ವರಯ್ಯ :ವ್ಯಕ್ತಿ ಮತ್ತು ಐತಿಹ್ಯ - ಎ. ಎನ್. ಮೂರ್ತಿರಾವ್** **2. ಷೇರುಪೇಟೆ ,ಹಣಕಾಸು ನಿರ್ವಹಣೆ ಮತ್ತು ಮಾರುಕಟ್ಟೆ : ಟಿ. ಎಲ್ .ರವೀಂದ್ರ** **ಪಠ್ಯಪುಸ್ತಕ :- ಘಟಕ 4 4.1: 78-83 4.2: 98-10**
ಘಟಕ– 5 **03 Hrs**
ಕಥೆಮತ್ತುಜೀವನದನೈಜಕ್ಷಣಗಳು - **1.ಯುಗಾದಿ :ವಸುಧೇಂದ್ರ** **2.ವೈಚಾರಿಕತೆಯಲೇಖನನೇಮಿಚಂದ್ರರವರ – "ಸೋಲೆಂಬುವುದುಅಲ್ಪವಿರಾಮ"ಲೇಖನ** **ಪಠ್ಯಪುಸ್ತಕ :-5.1:87-98 5.2: 65-70**

Course Out comes:After completing the course,the students will be able to	
CO1	ಕನ್ನಡಭಾಷೆ ,ಸಾಹಿತ್ಯ ಮತ್ತು ಸಂಸ್ಕೃತಿಯ ಪರಿಚಯವಾಗುತ್ತದೆ.
CO2	ಕನ್ನಡ ಸಾಹಿತ್ಯದ ಆಧುನಿಕ ಪೂರ್ವ ಮತ್ತು ಆಧುನಿಕ ಕಾವ್ಯಗಳು ಸಂಸ್ಕೃತಿಯ ಬಗ್ಗೆ ಆಸಕ್ತಿಯು ಮೂಡುತ್ತದೆ
CO3	ತಾಂತ್ರಿಕ ವ್ಯಕ್ತಿಗಳ ಪರಿಚಯವಾಗುತ್ತದೆ.
CO4	ಕನ್ನಡ ಭಾಷಾಭ್ಯಾಸ ,ಸಾಮಾನ್ಯ ಕನ್ನಡ ಆಡಳಿತ ಕನ್ನಡದ ಪದಗಳ ಪರಿಚಯವಾಗುತ್ತದೆ.
CO5	ಮಾನವೀಯ ಮೌಲ್ಯಗಳ ಬಗ್ಗೆ ಅರಿವು ಮೂಡಿಸುವುದು.

Semester: I/II						
Balake kannada (Common to all the branches)						
Course Code	:	**BBKA107/ BBKA207**		**Credits**	:	**1**
Hours/Week(L:T:P)	:	**1:0:0**		**CIE**	:	**50 Marks**
Total Hours	:	**15**		**SEE**	:	**50 Marks**
Course Type	:	**HSSMC**		**SEE Duration**	:	**1 Hours**

Prerequisites:	
Courses	**Kannada**
Knowledge on Fundamental Concepts	**Understanding of kannada lauguage, Cultural nuances, rituals etc.**
Knowledge on Connected Tools (If any)	**NA**

Course Objectives: ಬಳಕೆ ಕನ್ನಡ ಪಠ್ಯ ಕಲಿಕೆ ಉದ್ದೇಶಗಳು:	
This Course will enable the students to,	
CO1	Create the awareness regarding the necessity of learning local language for comfortable and healthy life.
CO2	Enable learners to Listen and understand the Kannada language.
CO3	Speak, read and write Kannada language conversations.
CO4	Train the learners for correct and polite conservation.
CO5	Know about Karnataka state language and literature.

Module -1	**03 Hrs**
Introduction, Necessity of learning a local language. Methods to learn the Kannada language. Easy learning of a Kannada Language: A few tips. Hints for correct and polite conservation, Listen in and Speaking Activities, Key to Transcription, ವೈಯಕ್ತಿಕ ,ಸ್ವಾಮ್ಯಸೂಚಕ/ ಸಂಬಂಧಿತ ಸರ್ವನಾಮಗಳು ಮತ್ತು ಪ್ರಶ್ನಾರ್ಥಕ ಪದಗಳು - Personal Pronouns, Possessive Forms, Interrogative words **Text Book: Lesson 1-3**	
Module - 2	**03 Hrs**
ನಾಮಪದಗಳ ಸಂಬಂಧಾರ್ಥಕ ರೂಪಗಳು, ಸಂದೇಹಾಸ್ಪದ ಪ್ರಶ್ನೆಗಳು ಮತ್ತು ಸಂಬಂಧವಾಚಕ ನಾಮಪದಗಳು- Possessive forms of nouns, dubitive question and Relative nouns ಗುಣ, ಪರಿಮಾಣ ಮತ್ತು ವರ್ಣ ಬಣ್ಣ ವಿಶೇಷಣಗಳು ,ಸಂಖ್ಯಾ ವಾಚಕಗಳು Qualitative, Quantitative and Colour Adjectives, Numerals **Text Book: Lesson 4-5**	
Module - 3	**03 Hrs**
ಚತುರ್ಥಿ ವಿಭಕ್ತಿ ಪ್ರತ್ಯಯದ ಬಳಕೆ ಮತ್ತು ಸಂಖ್ಯಾವಾಚಕಗಳು - Dative Cases, and Numerals, ಸಂಖ್ಯಾಗುಣವಾಚಕಗಳು ಮತ್ತು ಬಹುವಚನ ನಾಮರೂಪಗಳು -Ordinal numerals and Plural markers, ಸಪ್ತಮಿ ವಿಭಕ್ತಿ ಪ್ರತ್ಯಯ Locative Case **Text Book: Lesson 6-7**	
Module - 4	**03 Hrs**
ನ್ಯೂನ /ನಿಷೇಧಾರ್ಥಕ ಕ್ರಿಯಾಪದಗಳು ಮತ್ತು ವರ್ಣ ಗುಣವಾಚಕಗಳು -Defective/Negative Verbs & Colour Adjectives ಸಾಮಾನ್ಯ ಸಂಭಾಷಣೆಗಳಲ್ಲಿ ದ್ವಿತೀಯ ವಿಭಕ್ತಿ ಪ್ರತ್ಯಯಗಳು ಮತ್ತು ಸಂಭವನೀಯ ಪ್ರಕಾರಗಳು - Accusative Cases and Potential Forms used in General Communication **Text Book: 1, Lesson 8-10**	

Module - 5	03 Hrs
ಇರು ಮತ್ತು ಇರಲ್ಲ" ಸಹಾಯಕ ಕ್ರಿಯಾಪದಗಳು ಸಂಭಾವ್ಯಸೂಚಕ ಮತ್ತು ನಿಷೇಧಾರ್ಥಕ ಕ್ರಿಯಾಪದಗಳು- Helping Verbs “iru and iralla”, Corresponding Future and Negation Verbs, ಕಾಲ ಮತ್ತು ಸಮಯದ ಹಾಗೂ ಕ್ರಿಯಾ ಪದಗಳ ವಿವಿಧ ಪ್ರಕಾರಗಳು - Different types of Tense, Time and Verb, Kannada Vocabulary List : ಸಂಭಾಷಣೆಯಲ್ಲಿ ದಿನೋಪಯೋಗಿ ಕನ್ನಡ ಪದಗಳು -Kannada Words in Conversation **Text Book: 1, Lesson 11-12**	

Course Outcomes: After completing the course the students will be able to	
CO1	Understand the importance of kannada language.
CO2	Articulate in the kannada language properly.
CO3	Apply various forms of nouns, verbs & adjectives in their conversations.
CO4	Read and write kannada language.
CO5	Prepare a report on current affairs by reading kannada news papers.

Mathematics-II for EC Stream **Stream: EC**						
Course Code	**:**	**BMATE201**		**Credits**	**:**	4
Hours/Week(L:T:P)	**:**	2:2:2		**CIE**	**:**	50Marks
Total Hours	**:**	40L+12P		**SEE**	**:**	50Marks
Course Type	**:**	ESC(IC)		**SEE Duration**	**:**	3 Hours

Prerequisites:	
Courses	
Knowledge on Fundamental Concepts	**Basic Differentiation, Integration, Matrix**
Knowledge on Connected Tools (If any)	**Basic computer knowledge**

Course Learning Objectives: This course will enable the students to	
CLO1	Familiarize with the fundamentals of Vector calculus and
CLO2	Learn vector calculus, vector spaces, linear transformations, modular arithmetic, and numerical methods to solve engineering problems.
CLO3	Develop the knowledge of solving numerical methods and apply them to solve differential equations.
CLO4	Apply the knowledge of calculus, vector space, linear transformation and numerical techniques in various fields of computer science and engineering
CLO5	Learn making use of modern mathematical tools namely MATHEMATICA / MATLAB / PYTHON/ SCILAB to find the solution in Calculus, Differentiation and Matrix concepts.

Module – 1	**08Hrs**
Vector Calculus: Introduction to Vector Calculus, Scalar and Vector fields. Gradient, Directional derivative, curl and divergence - physical interpretation, Solenoidal and Irrotational vector fields- Problems. **Vector Integration:** Line integrals, Surface integrals. Applications to work done by a force and flux. Statement of Green's theorem and Stoke's theorem (without proof)-Problems. **Applications:** Velocity and acceleration in scalar and vector fields. **Self-study:** Curvilinear coordinates- Cylindrical coordinate system. **Text Book 1:Ch 8: 8.1, 8.2, 8.3(1), 8.4- 8.7, 8.11, 8.13, 8.14, 8.18(1,2), 8.19 - 8.21.** **Text Book 2: Ch 15: 15.2 - 15.4, 15.7, Ch 16: 16.2, 16.5, 16.6.**	
Module – 2	**08Hrs**
Vector Spaces and Linear Transformations: Vector spaces: Definition and examples, subspace, linear span, Linearly independent and dependent sets, Basis and dimension. Problems. **Linear transformations:** Definition and examples, Algebra of transformations, Matrix of a linear transformation. Change of coordinates, Rank and nullity of a linear operator, Rank-nullity theorem. Inner product spaces and orthogonality. Problems. **Applications:** Image processing. **Self-study:** Angles and Projections, Graphs and networks, Computer graphics. (RBT Levels: L1, L2 and L3) **Text Book 3:Ch4: 4.1, 4.2, 4.3, 4.5, 4.6.**	
Module – 3	**08 Hrs**

Laplace transforms:
Introduction to Laplace transforms, Transform of elementary functions (without proof), Properties–Linearity, Scaling, shifting, division by t, Periodic functions and Unit step function.
Inverse Laplace Transforms: Definition, properties, evaluation using partial fractions - problems, and applications to solve ordinary differential equations.

Applications: Problems on unit impulse function.

Self-study: Convolution Theorem. (RBT Levels: L1, L2 and L3)

Text Book 1: Ch 21: 21.1 - 21.5, 21.7, 21.9, 21.10, 21.12 - 21.18.
Text Book 2: Ch 12: 12.1, 12.3 - 12.9.

Module – 4	**08 Hrs**

Numerical Methods-1:
Solution of algebraic and transcendental equations – Regula-Falsi and Newton-Raphson methods (only formulae). Problems. Finite differences, Interpolation using Newton's forward and backward difference formulae, Newton's divided difference formula and Lagrange's interpolation formula (All formulae without proof). Problems.
Numerical integration: Trapezoidal, Simpson's (1/3) rd and (3/8) th rules (without proof). Problems.

Applications: Area, Velocity and population.

Self-Study: Numerical integration by Weddle's Rule.
(RBT Levels: L1, L2 and L3)

Text Book 1: Ch 28: 28.2, 28.2(2), 28.2(3), Ch 29: 29.1(1,2), 29.6, 29.10, 30.6, 30.7, 30.8, 30.10.
Text Book 2: Ch 32: 32.1 - 32.4, 32.7 - 32.10, 32.14.

Module – 5	**08 Hrs**

Numerical Methods-2: Numerical Solution of Ordinary Differential Equations (ODE's) of first order and first degree - Picard's method, Taylor's series method, Modified Euler's method, Runge-Kutta method of fourth order and Milne's predictor-corrector formula (No derivations of formulae). Problems.

Applications: Estimating the approximate solutions of ODE.
(RBT Levels: L1, L2 and L3).

Self-Study: Adam-Bashforth method.

Text Book 1:Ch32: 32.3, 32.5, 32.7, 32.9.
Text Book 2: Ch 33: 33.1, 33.2, 33.3.

Course Outcomes: After completing the course, the students will be able to	
CO1	Apply the concept of change of order of integration and variables to evaluate multiple integrals and their usage in computing area and volume.
CO2	Understand the applications of vector calculus and Vector integration refer to solenoidal, irrotational, work done using vector differentiation and vector integration.
CO3	Demonstration of periodic signal, unit impulse signal and unit step signal.
CO4	Solve roots of algebraic and transcendental equations and find the solutions of first order differential equations numerically
CO5	Familiarize with modern mathematical tools namely MAXIMA/MATLAB/ PYTHON

Applied Physics for EC Stream **Stream: EC**						
Course Code	**:**	**BPHYE202**		**Credits**	**:**	4
Hours/Week(L:T:P)	**:**	2:2:2		**CIE**	**:**	50Marks
Total Hours	**:**	40L+12P		**SEE**	**:**	50Marks
Course Type	**:**	ESC(IC)		**SEE Duration**	**:**	3 Hours

Prerequisites:	
Courses	Basics of Physics
Knowledge on Fundamental Concepts	Principles, assumptions, Fundamentals of Physics
Knowledge on Connected Tools (If any)	Experimental demonstration skills

Course Learning Objectives: This course will enable the students to	
CLO1	Study the essentials of photonics for engineering applications, with the basic principles of LASER and optical fibers.
CLO2	Study the principles of quantum mechanics
CLO3	Understand the properties of conductors, semiconductors, and dielectric materials
CLO4	Understand the fundamentals of magnetic properties of materials and superconductivity.
CLO5	Gain practical exposure to electronic devices and experimentation.

Module – 1	**08Hrs**
Laser and Optical fibers: **Lasers:** Characteristics of LASER, Interaction of radiation with matter, Expression for Energy Density and its significance. Requisites of a Laser System. Conditions for Laser action. Principle, Construction and Working of Carbon Dioxide Laser. Application of Lasers in Defense (Laser range finder) and Laser Printing. Numerical Problems **Optical Fibers:** Total Internal Reflection, Propagation mechanism, Angle of Acceptance, Numerical Aperture, Fractional Index Change, Modes of Propagation, Number of Modes and V Number, Types of Optical Fibers. Attenuation and Mention of Expression for Attenuation coefficient, Discussion of Block Diagram of Point to Point Communication, Intensity based Fiber Optic Displacement Sensor, Merits and Demerits, Numerical problems. **Text Book 1: Ch 44: 44.1 to 44.13, Ch 47: 47.1 to 47.22** **Text Book 2:Ch 31: 31.1 to 31.9, Ch 32: 32.6 to 32.12** **Text Book 3: Ch 6(ed11,14), Ch 7(ed11,14)**	
Module – 2	**08Hrs**
Quantum Mechanics: Matter Wavesand de Broglie Hypothesis, de Broglie wavelength and derivation of expression by analogy, Phase Velocity and Group Velocity, Heisenberg's Uncertainty Principle and its application (Non existence of electron inside the nucleus-Non Relativistic), Wave Function, Time	

independent Schrödinger wave equation, Physical Significance of a wave function and Born Interpretation, Expectation value, Eigen functions and Eigen Values, Particle inside one dimensional infinite potential well, Waveforms and Probabilities. Numerical Problems

Text Book 1: Ch 27: 27.1 to 27.13
Text Book 2: Ch 57: 57.1 to57.3, 57.6 to 57.17
Text Book 3: Ch 2 (ed11,14)

Module – 3	**08 Hrs**

Electrical and dielectric Properties of Solids

Electrical Properties of Solids: Review of classical free electron theory, limitations of classical free electron theory. Postulates of quantum free electron theory, Fermi energy, Fermi velocity, Fermi temperature. Fermi factor and its dependence on energy and temperature. Electrical conductivity (expression using QFET). Merits of quantum free electron theory. Problems.

Dielectric Properties of materials :

Dielectric constant and polarization of dielectric materials - Types of polarization – Equation for internal field in liquids and solids (one dimensional) – Clausius Mosotti equation – Ferro and Piezo electricity (qualitative) – Frequency dependence of dielectric constant- Important applications of dielectric materials. Numerical Problems.

Text Book 1: Ch 35: 35.14 to 35.18, Ch 40: 40.1 to 40.5, 40.13, 40.15, 40.18,40.21, 40.23, 40.24
Text Book 3: Ch 3(ed11,14), Ch 4(ed11)

Module – 4	**08 Hrs**

Semiconductors and Devices:

Fermi level in Intrinsic & Extrinsic Semiconductor, Expression for concentration of electrons in conduction band & holes concentration in valance band (only mention the expression), Relation between Fermi energy & Energy gap in intrinsic semiconductors (derivation), Law of mass action, Electrical conductivity of a semiconductor (derivation), Hall effect, Expression for Hall coefficient (derivation) and its application. Photo-diode and Power responsivity, Construction and working of Semiconducting Laser, Four probe method to determine resistivity, Phototransistor, Numerical problems.

Text Book 1: Ch 37: 37.3, 37.15 to 37.17, 37.23, 37.24, 37.28
Text Book 3: Ch 4(ed14)

Module – 5	**08 Hrs**

Magnetic Properties of materials and Superconductivity

Magnetic Properties of materials:

Classification of dia, para and ferromagnetic materials. Curie Temperature Hysteresis in ferromagnetic materials. Soft and Hard magnetic materials. Applications.

Superconductivity: Introduction to Superconductors, Temperature dependence of resistivity, Meissner Effect, Critical Field, Temperature dependence of Critical field, Types of Super Conductors, BCS theory (Qualitative), High Temperature superconductivity, SQUID, MAGLEV, Numerical problems.

Text Book 1: Ch 41: 41.5 to 41.8, 41.14 to 41.16, Ch 42: 42.1 to 42.10
Text Book 2: Ch 48: 48.17, 48.20, Ch 60: 60.10 to 60.13
Text Book 3: Ch 5(ed11), Ch 8(ed11), Ch 5(ed14)

Course Outcomes: After completing the course, the students will be able to	
CO1	**Describe the principles of LASERS, optical fibers, and their relevant applications**
CO2	**Comprehend the wave-particle dualism and mathematical formulation of Schrödinger's wave equations and their applications**

CO3	**Illustrate the concepts of conductors, semiconductors, and dielectric materials**
CO4	**Analyze and interpret the types and requirements of magnetic materials and superconductors**
CO5	**Conduct experiments to obtain the desired parameter of the given material / Physical system.**

Laboratory Component:
Ten Experiments have to be completed from the list of experiments
Note: The experiments have to be classified into
a) Exercise
b) Demonstration
c) Structured Inquiry
d) Open Ended
Based on the convenience classify the following experiments into above categories selecting at least three experiments for each type. Select at least one simulation/spreadsheet activity.

List of Experiments

1	Determination of wavelength of LASER using Diffraction Grating.
2	Determination of acceptance angle and numerical aperture of the given Optical Fiber.
3	Determination of Plank's Constant using LEDs.
4	Study the voltage and current (VI) Characteristics of a Photo-Diode
5	Determination of Fermi Energy of Copper.
6	Determination of dielectric constant of the material of capacitor by Charging and Discharging method.
7	Identification of circuit elements in a Black Box and determination of values of the components.
8	Study the I-V Characteristics of the Given Bipolar Junction Transistor.
9	Study the frequency response of Series & Parallel LCR circuits.
10	Determination of Magnetic Flux Density at any point along the axis of a circular coil.

Semester: II						
BASIC ELECTRONICS **Stream: EC (Only for ECE Students)**						
Course Code	**:**	**BBECE203**		**Credits**	**:**	3
Hours/Week (L:T:P)	**:**	2:0:2		**CIE**	**:**	50 Marks
Total Hours	**:**	40L+12P		**SEE**	**:**	50 Marks
Course Type	**:**	ESC(IC)		**SEE Duration**	**:**	3 Hours

Prerequisites:	
Courses	Physics, Mathematics
Knowledge on Fundamental Concepts	Basic Electrical and circuit Concepts
Knowledge on Connected Tools (If any)	Simulation Software, Electronic Prototyping tools or electronic test and Measuring tools

Course Learning Objectives: This course will enable the students to	
1	Gain fundamental knowledge in the field of Electronics and Communication Engineering
2	Equip students with a basic foundation in electronic engineering fundamentals required for comprehending the operation and application of electronic circuits, logic design and communication systems.
3	Simulate the electronic circuits using modern Engineering tools

Module – 1	**08 Hrs**
Semiconductor Diodes: Introduction, PN Junction diode, Characteristics and Parameters, Diode, Approximations, DC Load Line analysis **Text Book 1: Ch 2: 2.1,2.2,2.3,2.4** **Diode Applications:** Introduction, Half Wave Rectification, Full Wave Rectification, Full Wave Rectifier Power Supply: Capacitor Filter Circuit, RC π Filter (includes numerical). **Text Book 1: Ch 3: 3.1,3.2,3.4,3.5** **Zener Diodes:** Introduction, Zener Diode Voltage Regulator **Text Book 1: Ch 2: 2.9, Ch 3:3.7**	
Module – 2	**08 Hrs**
Bipolar Junction Transistors: Introduction, BJT Voltages & Currents (includes numerical), BJT Amplification, Common Base Characteristics, Common Emitter Characteristics, Common Collector Characteristics. **Text Book 1: Ch 4: 4.2, 4.3, 4.5, 4.6, 4.7** **BJT Biasing:** Introduction, DC Load line and Bias point. **Text Book 1: Ch 5: 5.1** **Field Effect Transistor:** MOSFETs: Enhancement MOSFETs, Depletion-Enhancement MOSFETs **Text Book 1: Ch 9: 9.5**	
Module – 3	**08 Hrs**
Operational Amplifiers: Introduction, Block Diagram of Op-Amp, Schematic Symbol, Op-Amp Characteristics - Gain, input resistance, Output resistance, CMRR, Slew rate, Bandwidth, input offset voltage, Input bias Current and Input offset Current, The Ideal Op-Amp, Equivalent Circuit of Op-Amp, Op-Amp Configurations: Open loop, Inverting, Non-inverting and Differential amplifier **Text Book 2: Ch 1: 1.1, 1.2, 1.3, 1.5, Ch 2: 2.2, 2.3, 2.4, 2.6** **Op-Amp Applications:** Inverting Configuration: Summing, scaling, Averaging circuit, Differential Configuration: Subtractor Voltage Follower, Integrator and Differentiator (includes numerical) **Text Book 2: Ch 6: 6.5.1, 6.5.3(a), 6.12, 6.13**	

Module – 4	08 Hrs
Boolean Algebra and Logic Circuits: Binary numbers, Number Base Conversion, Octal & Hexadecimal Numbers, Complements, Basic definitions, Axiomatic Definition of Boolean Algebra, Basic Theorems and Properties of Boolean Algebra, Boolean Functions, Canonical and Standard Forms, Other Logic Operations, Digital Logic Gates (includes numerical). **Text Book 3: Ch 1:1.2, 1.3, 1.4, 1.5, Ch 2: 2.1, 2.2, 2.3, 2.4, 2.5, 2.6, 2.7** **Combinational logic:** Introduction, Design procedure, Adders- Half adder, Full adder **Text Book 3: Ch 4: 4.1,4.2,4.3** **Sequential Logic:** Introduction, Flip-Flops: SR, D, T and JK flip-flops **Text Book 3: Ch 6: 6.1,6.2**	
Module – 5	**08 Hrs**
Transducers: Introduction, Types of transducers: Resistive Transducers, Capacitive Transducers, Inductive Transducers, Piezoelectric Transducers & Photo Electric Transducers **Text Book 4: Ch 13: 13.1,13.3,13.4,13.11,13.13,13.15,13.16** **Communication:** Introduction, Communication System, Modulation **Text Book 5: Ch 1: 1.1,1.2**	

Course Outcomes: After completing the course, the students will be able to	
CO1	Apply the basic principles of Electronics to solve Analog and Digital circuits (L1, L2, L3)
CO2	Analyze the characteristics/performance parameters of Electronic Circuits (L2, L3, L4)
CO3	Design basic Electronic Circuits for given Specifications (L2, L3, L4)
CO4	Understand the fundamentals of communication system and principles of basic transducers (L1, L2)
CO5	Demonstrate (Hardware/Simulation) the performance of electronic circuits using modern Engineering tools (L3, L4)

Practical component of Integrated Course (IC):

Note: Experiments can be conducted either using any circuit simulation software or discrete components

Sl No.	Title of Experiments
1	Plot V-I characteristics of PN junction diode
2	Test Half wave rectifier – with and without filter
3	Test Full wave rectifier – with and without filter
4	Implement Zener diode as a voltage regulator
5	Plot Input and output characteristics of BJT
6	Plot Input and output characteristics of FET
7	Design inverting and Non-inverting operational amplifiers
8	Design and test Op-Amp based differentiator and integrator
9	Verify De-Morgan's Theorem for 3 variables
10	Implement Half Adder & Full Adder using basic gates and NAND gates

Semester: I/II						
Innovation and Design Thinking (Common to all the branches)						
Course Code	**:**	**BIDT108/BIDT208**		**Credits**	**:**	1
Hours/Week(L:T:P)	**:**	1:0:0		**CIE**	**:**	50 Marks
Total Hours	**:**	15		**SEE**	**:**	50 Marks
Course Type	**:**	HSSMC		**SEE Duration**	**:**	1 Hours

Prerequisites:	
Courses	Mathematics, Science and English
Knowledge on Fundamental Concepts	Creative Thinking, Problem-Solving and Decision-Making, Basic Business and Entrepreneurship, Communication and Collaboration Skills
Knowledge on Connected Tools (If any)	**NA**

Course Learning Objectives: This course will enable the students to	
CLO1	Elucidate the concept of design thinking for product and service development.
CLO2	Describe the fundamental concept of innovation and design thinking.
CLO3	Discuss the methods of implementing design thinking in the real world.

Module – 1	**3 Hrs**
PROCESS OF DESIGN **Understanding Design thinking,** Shared model in team-based design – Theory and practice in Design thinking – Explore presentation signers across globe – MVP or Prototyping. **Text Book 1: Ch: 1, 1.1-1.3** **Text Book 2: Part-1 & 2**	
Module – 2	**3 Hrs**
Tools for Design Thinking, Real-Time design interaction capture and analysis – Enabling efficient collaboration in digital space – Empathy for design – Collaboration in distributed Design **Text Book 2: Part-3**	
Module-3	**3 Hrs**
Design Thinking in IT Design Thinking to Business Process modelling – Agile in Virtual collaboration environment – Scenario based Prototyping **Text Book 2: Part-4**	
Module-4	**3 Hrs**
DT For strategic innovations, Growth – Story telling representation – Strategic Foresight - Change – Sense Making - Maintenance Relevance – Value redefinition - Extreme Competition – experience design - Standardization – Humanization - Creative Culture – Rapid prototyping, Strategy and Organization – Business Model design **Text Book 3: Ch:1-4**	
Module-5	**3Hrs**
Design thinking workshop, Design Thinking Work shop Empathize, Design, Ideate, Prototype and Test **Web link**: 6	

Course Outcomes: After completing the course, the students will be able to	
CO1	Appreciate various design process procedures
CO2	Generate and develop design ideas through different technique
CO3	Identify the significance of reverse Engineering to Understand products
CO4	Draw technical sketch for design ideas
CO5	Conduct and Facilitate Design Thinking Workshops

SJC Institute of Technology
A Premier Institution in Engineering and Management Education

SJC Institute of Technology is a premier institute under Visvesvaraya Technological University (VTU) established in 1986. The Institute managed by Sri Adichunchanagiri Shikshana Trust (R.) founded in 1974 by the divine soul of Jagadguru Padmabhushana Sri Sri Sri Dr. Balagangadharanatha Mahaswamiji. The trust is under the astute visionary and spiritual guidance of Paramapoojya Jagadguru Sri Sri Sri Dr. Nirmalanandanatha Mahaswamiji. The Trust runs more than 516 Institutions all over the states of Karnataka, Maharashtra, Tamilnadu, Andhra Pradesh & Delhi. SJCIT is approved by AICTE, accredited by NAAC with A+ Grade, 6 Engineering Departments Accredited by NBA, NIRF Ranking in the bandwidth of (151-300) and Gold rated by QS I-Gauge. The institute offers eleven UG Courses: ECE, CSE, ISE, ME, CV, AE, AS, AI-ML, AI&DS, CSD & CV (Kan) and Five PG Courses in Engineering and MBA along with Nine VTU recognized R&D centers. The institute has an excellent track record of results with university ranks and placements in past years. Along with academics, the students also participate and excel in extra-curricular and co-curricular activities through active cultural, sports and social groups. Our goal is to mould students into highly skilled technical and management professionals with a wide range of analytical, strategic and leadership capabilities to meet the global challenges.

HIGHLIGHTS

- **38 years of excellence with relentless service to society imparting quality education.**
- **3060+ Students and 24000+ alumni network.**
- **204+ Experienced, Well qualified and Passionate faculty with 60+ Doctorates, 210+ Non-Teaching Staff.**
- **Consistency in achieving 95% & above Results with Ranks and Medals at University Exams. 72 Ranks and 15 Gold Medals have been fetched so far.**
- **Training and Expert Guidance on Technical Domains for Placement and Career Development with blended training model.**
- **100% Placement opportunity for all Students and more than 95% Placements for eligible candidates. 846+ job offers in 2022, 720+ job offers in 2023 and 456+ in 2024 still on going, with highest package of 28 LPA and average package 5.6 LPA.**
- **BGS-SJCIT Incubation foundation, IP Cell, EDC, CoEs, Student Excellence and Empowerment Development Centre (SEED).**
- **BGS R&D Centre - BARC, NAIN, BOSCH REXROTH Automation Centre, and Completed funded projects worth 3 crores projects worth 1crore.**
- **MoUs with reputed companies leading to Internships, Projects and Industry visits.**

SJC INSTITUTE OF TECHNOLOGY

An Autonomous Institution under VTU from 2024-25
